

Europe's So Called "Demographic" Problem

HP Hoodedcobra666

October 24, 2018

I am talking about the migration waves of the 3rd world whose mission is to just take pensions and fold stamps to "feel gud" in the millions.

As for transfer for students there is nothing wrong. Nor for tourism or limited labor. But for millions to just transfer and live on free money forever in a host country and envision a life like that, is that even correct.

Lastly in USSR ruled countries there is not development like the US but this is the case for most other European countries. But they are developed to an extent. Way more than people are thinking compared to many countries like Pakistan.

This granted, there is will and knowledge (Whites can go abroad and study to other White countries and gain expertise) can be fixed in a few decades in full.

So migration for studying and experience is actually great for long term planning. Plus, upon your return, job wise, you will be a king in your country compared to the lazy people you describe. And better able to direct them in the proper way.

The solution of migration is people migrate for two reasons. Metaphorically speaking some are parasites and just move to rip the skin off the beautiful people and try to stick it in their face. Others just migrate to learn how to be more beautiful and self-apply it. While the second are a blessing the first are a curse.

For most of the time in the past we had the second type therefore things were decent. Now, we have the first type, in which the jewish governments literally just try to give the nation away. Which only collapses a nation.

In the future the developed White countries will help the less developed directly. Those who do not help the world advance will be attacked.

Plus, lack of development is not always bad. I do not think for example Ukraine needs the conversation about having cameras that scan your face and send it directly to the gov so they blacklist people 24/7. And you do not have dangerous cancerous experimental drinks on the market or all sorts of dangerous drugs on every corner. Maybe lack of "development" is not so bad in all ways.

White to White between countries should have more loose standards as time goes. Since it's the same race moving from one place to another. And there should be acceptance and lenience.

Lastly the jews in the European Kike Union say there are gaps in developed countries in regards to workers and pensions. But there are White Youth all over Europe being Neets

aka Youth that do nothing and are well studied, and just swamp and play video games depressed all day.

There is also a country filled with persecuted and highly skilled Whites who need a new life, that is, South Africans. If they brought people from there systematically in, not only they would save them, but also enhance Europe. A people which if not helped immediately will get massacred in a racial apocalyptic war. These people know English and they have all the technical knowledge and White character ready to just come and adjust in the matter of months. They should be welcomed in their ancestral homeland but who cares...

But it's fine let's import all the Nigerian prisons and terrorists from the East. This will definitely help a lot. But Jewropean Union wants black kids too for its pedophile rings and therefore it cannot take in only Whites...Nor would rabbis approve of that.

And this is where the jewish conspiracy becomes clear as sky. The Kalergi plan of Jews. It is clear the issue is not demographic, not about finances, not about work, and not about development. All of these are excuses.

Anyone who has studied how this went from 2012 with bringing these people in they find that only 10% does anything valuable. The next 90% just writes rap songs about taking the spines out of White babies, do crimes, or just sit in palaces in Cologne with state pensions.

As for the other academic argument of pensions and the rest of the garbage and how these need to be supported. When you inject people to support future pensioners, you CREATE future pensioners. In proven statistics actually you create endless deficit since most of these people not even work or want any so called "integration".

So essentially you create a financial black hole: money spent to educate these people who will in the end contribute nothing. This, doubles or triples the first initial problem of labor and pensions. Since you are just paying lazy people pensions from...DAY ONE. And not 40 years later as calculated. So, you are essentially fucked on the spot. This process increases the first problem exponentially. So, what is the solution of jewish academia...IMPORT MORE OF THE THIRD WORLD.

This clearly overburdens the economy of any state and just collapses it. But who cares? Its Arabian and European Goyim that will die in this, and some Goyim country will go under? Why should the masters of this stupid plan be interested?

Plus, anyone who watches academia on the subject will see they just create forgeries of studies and also do not generate new knowledge on the subject since 2015. Also, they have dropped the claims that do not coincide with the jewish agenda. And finally, they have stopped relating to the news the beautiful Kalergi things that happen such as taking the spines out of babies as national anthems of the so called "oppressed" in Paris.

South Africans could be evacuated and also help us directly. In the span of a month in most countries with zero money spent they could instantly work and habitualize. Since they are White, most are very hardworking, and have knowledge in any field.

But the reason is there is not any real demographic problem, if there ever was, they do not want it fixed, and if there was any financial problems, they only want to further it to collapse Europe. Oh, and create the bastardized race of "Asiatic Black White Origin" which is called the Kalergi's children. And who knows maybe also Islamify Europe too for extra points in Jewish rewards.

So the purpose is clear: Injecting inferior criminals in Europe to arouse religious warfare, territorial conquest, and destruction of the White race in their own homelands and continent.

This in the future will also contribute to the destruction of White South Africans.

If you were a Jew looking at this situation, it goes PERFECT for you. White countries go extinct during seeming PEACETIME, and in a way where you will also take down endless other goyim races in the process. Could it be more perfect?

The drawbacks? Jews are getting exposed worldwide.

So in Europe...There is no demographic problem before that could not be easily fixed, it is only caused right now. Not a demographic problem but an extinction problem.

"This adds up, and the end result is a chaotic planet. This is the case with people and races who do not build their countries"

Reckoned666 [wrote]:

"Is it always worth to stay in the country and do your best to build it, instead of going somewhere else?"

My country got cucked incredibly hard by USSR, and even now isn't fully recovered yet, rather not even half recovered of what it used to be. The culture is half Russian-ish (of course only the bad traits of Russian culture), and half of my own nation. Which is an awful combination. Nobody cares about labor or self-improvement, rather just stay jobless and get a petty allowance just to cover your bills and eat.

That's why I plan to study abroad and build labor there, and then maybe after I improved a lot myself and have attained a decent financial status, can go back to my own country and do my best to make positive changes there. I'm not going to go to London or whichever huge city which is a mix of godzillion races and has a culture of joo knows what."
