

Tesla and the Nazis

HP Hooded Cobra 666

[June 11, 2017](#)

Reading on Tesla, one quickly understands that this man wasn't really a "Scientist" or even a "Genius". He was a God in the flesh in more than one way, same as Hitler and other beings of such stature. He openly states in his auto-biography going to other planets by astral projection, and meeting beings and his friends. It should be evident that a man with such a great heart, was not associating with human hating aliens, or other hostile entities.

It's well known Tesla took 95% of his inventions to his grave. This refusal shows that he was allied to good forces out there. Tesla was an Aryan, White Serbian man. He stored all his inventions in his mind, so to say. He had the plans for free electricity for all mankind, free energy, healing machines and so forth. Tesla's complaint was basically that Humanity wasn't ready for it. He however gave us the circulating current, which later resulted in the advanced machinery, the internet and all these other things which have permanently improved our life.

Tesla, rather than wasting his time like the psychopath jew Einstein, in creating Atomic bombs and other things that would destroy humanity, focused his mind on other endeavors, mainly, technology for peace.

In any way, Tesla's 'potentially befriending' Nazis was known. It's written that Tesla had a friendship with George Sylvester Viereck, National Socialist propagandist in the USA. Viereck also stated that Tesla's worldview was a view of worldwide Eugenics for the future of humanity. Which was the central thesis of the National Socialist Party. Tesla never refuted that claim, but neither endorsed it. It doesn't sound unlikely at all. Eugenics was a major idea of the time.

It's well known that Tesla also was snubbed and attacked by the "(((Scientific Community)))" of his time, including JP Morgan, a well-known jewish rabbinical family line racketeer, denied to give him a small loan of a few millions to give free, wireless electricity to all mankind. This would be the end of Judah and their financial system.

This would throw off the Oil Trade, which as you can see, is the money-making scheme of the jews, which pollutes and destroys the planet. The only good thing this does is fill the jewish pockets.

The (((American))) government did everything they could to restrain, and keep Tesla under tabs, at least physically.

What I want to focus upon is Tesla's anti-gravity saucers and anti-gravity technology. Many people can't seem to figure out how Tesla invented these things and how at the same time, the National Socialists were developing these things to win the war. Tesla could have made the USA win the war, and very easily, but decided to rather not intervene. This shows that he obviously didn't have any hostile feelings against the National Socialists.

At the time, National Socialist Germany was the superpower of the world, having the most advanced technology, with projects even today completely misunderstood by scientists. The USA became the next superpower, when the German scientists were taken over in the USA by operation paperclip, and only then.

They won the war on their numbers- not on technology. They were in the Stone Age in technology until the German scientists came to help them. The jews developed weaponry and other naturally disastrous weapons, but never anything really beneficial for humanity.

A lot of UFO-logists cannot make sense... How Tesla's anti-gravity tech and other inventions actually made it in Germany, or at least were shared.

This is simple: Because Tesla and Hitler, were talking to the same extraterrestrials. It's well known Hitler denied the creation of the Atomic Bomb, as he knew what a disaster such a bomb would be. It renders existence of life ill and pointless, and is a weapon hostile and pure evil to all life on earth. Therefore, they put scientists to work on other venues.

Tesla, at least from what I know, never shared the tech that he knew how to create. For this reason, the USA government bullied him, harassed him, and also punished him severely towards the end of his life. Tesla could have opened his mouth, but he knew where this whole deal was going, and therefore took the route of least resistance and let it go. It would ruin humanity. Tesla's weapons were more than likely hundreds of times stronger than atomic bombs.

It's well known, Tesla could have developed a "Death Beam" that would turn troops into jelly, and was he an "American" as many fools claim, he would have given this to the Kosherites of his time to end the war with the National Socialists

really fast. He decided to stay silent.

On the other hand, the extraterrestrials of the enemy, shared the Atomic bomb and other ugly weaponry to their enemies. Even nowadays, they do thousands of such experimentation, and explosions in deserts, every month. Many diseases, such as the diseases of Thyroid and many other cancers, did not exist before this 'technology' was given to the world by the jews. The jews developed this ugly technology.

So in closing I am led to believe that on an Astral level and via the proxy of the Gods, Tesla and the National Socialists were working for the same, or in the very least, a very SIMILAR purpose. Tesla could never be physically present in Nazi Germany, as basically, the FBI was tailing him 24/7. There is a report of 300 pages on Tesla.

He had limited if any physical freedom. However, it seems from the striking resemblances in understanding, and in how BOTH Tesla and the Nazis came up with Anti-Gravity technology, they both talked to the same ET's. Watching this documentary by Willian Lyne on Tesla and Nazi Anti-Gravity tech, is interesting to see Tesla's understanding of the tech.

In his biography Tesla states he went into other worlds, and made real good friendships with people from other worlds there.

Tesla knew about the Ether and the real nature of the world, compared to the jew Einstein, which only stole a falsified theory of relativity, ultimately leading humanity nowhere but in the atomic bomb and sensuous materialism. Tesla was a spiritual scientist. He wasn't a materialist nutcracker.

Tesla in one of his last interviews just said also that he knew about immortality and that this had to deal with the light returning to its original form. Which shows he might have had a solution for that too, figured out. Tesla, 'dying' in 1943, had just left humanity with what was absolutely enough and necessary to get into the next phase, but didn't advance humanity further because he knew where the whole deal was going.

Tesla was also known to have superhuman abilities such as sleeping for 3 to 4 hours, controlling his body functions (he talks about this), astral projection, superhuman reflexes, and many other spiritual gifts. His death in short, may have been his conscious choice to die.

This was his choice, and it's not by coincidence he chose to do so when the war turned against National Socialist Germany. He knew what could have befallen him later if it was for the enemy to rule the world, so he left. Since then, scientific advances have been childish and limited compared to what Tesla has given to the world, except of advanced rocketry, which was again given by Werner Von Braun, another German.

In the end, even if Tesla was not interested in micro-politics, he must have been acutely aware of the Jewish problem, or at least, experienced the misery coming from it.

Tesla was a victim of the same people Hitler tried to stop. And both of them had a greater vision for Humanity, which the very same people tried to suppress and destroy. As they do with everything good in life anyway, since forever.
