

# EU Backstabs the Internet Once More [Article 11 & 13]

HP Hoodedcobra666

March 26, 2019

On Article 13 and 11:

The enemy is on the deterioration stage, and they are mad. They are losing the information war against them. The enemy also understands the power of memes in awakening people, same as the awakening that has happened in all frontiers of life. Those who remember how things were 20 years ago information wise, know that we do not live in the same world. Indeed, information wise, we live in a far better and fair world, but this is attempted to be taken away from people.

In the last 2-3 years the enemy has went on a mass chimp-out to destroy and take down the meaningful things of the internet. These include the ability to search things properly on search engines, even stealing domains out of people who say things they do not like, and of course, the usual use of pseudo legalism and coercion against everyone from social pressure.

Suddenly you have a whole armada of NPC borgs who have problems with Pepe the Frog in the internet because Pepe the frog became an image for ideologies they do not agree with their NPC standards. Since they were cockblocked from imposing their feelings on the whole planet with their threats, coercion, and social NPC pressure, they invented some new pseudo legal techniques over copyrights and claimed 'infringements' to get people fucked.

The first purge of all the so called "Far Right" channels, including my channel, which, albeit unrelated to the general far right axis, was taken down on false pretexts of so called reports, yadda yadda.

The branding for "Hate Speech" doesn't really work constitutionally and by the human rights, not even legally (or what is still remaining of these human rights anyway) doesn't work to stop the impending defeat of the enemy and their agenda at the information stage. Anyone who ever has had a YouTube account, they know what this is about. Millions of people make a living from YouTube, and billions of people watch videos there every day.

The enemy clearly is not comfortable with free speech. Free speech is about freedom to put information out there, not in other people's faces, and not in their house, but it allows debate, however bottomless, on the public sphere, so long it doesn't condone the taking of criminal action. However, Freedom of speech supports the ability of the other people who disagree to assemble themselves on some other place, and protest, or talk about their opinions there.

When I write about things, I am talking in demeaning ways about human rights. This is because said rights exists only for the following categories: parasites, invading hordes, "other religions", and all sorts of individuals who are of use to the current systemic agenda. A Jew can write on Twitter, "kill a White man while you go to work", and a black person can

freely call in the street for the "Permanent extermination of white people to end oppression". These are all fine to talk, there is no 'problem'.

If one takes a round on the so-called internet, they will find pedo filth, christian forums and websites who talk about exterminating "Satanists", and all sorts of other abominations. I mean we live in a world where the Vatican is seen as some sort of spiritual authority, and where cardinals who have more than 100 molestations only get 6 years on a VIP jail, so it's to be expected. Of course, the so called "Powers that be" are only concerned about two things: If they are questioned for their jewishness, and if Pepe the Frog is posted somewhere.

Whenever communism arises, violent brute force is the last resort of it. It first cloaks itself in beautiful messages of universalism, 'helping the oppressed', and all sorts of other siren songs. It's when one steps on the island of the sirens that sees the corpses on the shore, but by then, it is too late. Likewise, these jewish legislations are professing to want to protect "Creators and their copyrights".

Arrests and extreme surveillance over mere superficiality, are the bread and butter of jewish communist governments. Innocents are scouted upon as espionage agents from hostile countries, 24/7 as if they were total, proven criminal abominations. In Orwell's 1984, the so called "Surveillance" is one's TV into a room, today, we have a "Smart TV" which when you press "I accept" on your so called "Terms of Service", has 50 pages of jew talk on the conditions under which this TV can open up a microphone in your own house. But at least we aren't living in Orwell's 1984. But somehow people are telling themselves we are living in a free society and not in Orwell's society.

Yet.

This perception has come due to the freedom of information. This very freedom of information however, is giving in now, as the enemy throws the final mask of their worthless empire of hobo goblins and worthless scat infested jews.

The internet is the only thing in this world which follows Satan's perception on how the world should be run, in the verbatim, as far as a concept is concerned. Everyone should have unbiased, and unrestrained internet access. Everyone should have the ability to see any information. The Internet is the only thing that belongs to "All of humanity", while at the same time, giving everyone the ability to be firmly separate and move within this information space as they see fit.

Of course, the enemy influence of the internet is really apparent, in how it's used by the enemy. This agenda is self-revealing, and it collapses upon its own head. To see how much the so called "Authorities" of Europe "Respect" their cattle citizens, it's important to see the below. The so called "Leaders" of the Jew-U are looking at people who disagree with them as basically cattle mob. "The mob doesn't understand our immaculate planning"

For those who do not know this is a real incident. The European Commission published an article on how the "Mob" is basically dumb and swayed and doesn't understand their so-called divine planning. Of course, the fault is always on the goyim. This is probably why

some of the top legal, freedom advocate, and internet authorities worldwide also did attack this censorship attempt, including the creator of the World Wide Web himself.

The article is here: <https://boingboing.net/2019/02/18/sopa2-0-acta2-0.html>

As for the evil White Oppressor who created the World Wide Web, you can read here: (Oy vey, a White Goy created dis, it must be censored by the Holy People such as Mark Zuckerberg) [https://en.wikipedia.org/wiki/Tim\\_Berners-Lee](https://en.wikipedia.org/wiki/Tim_Berners-Lee)

Well, the mob DID understand their plan, and this is why the internet got filled on the last years of activism and complaints about this preached pseudo-legalism which is supposed to drive people to the cliffs or to courts simply for using memes, and will kill fair use.

No, the Mob really understands it, and the "GOYIM KNOW".

What the Article 13 is about in simplification is that they will force any media platform to be "responsible" for the content people host, creating a big filter. Let's say for example you upload a video that has a copyright from X person. Instead of you being 'liable' (you will also be flagged as a thief probably) the YouTube will take it on themselves to be responsible for the said 'copyright', disallowing uploads completely. If you upload something that is not copyrighted by anyone, then Jewtube will have to ask for your permissions or more information on the upload, and so forth.

The whole censorship was also based on how the so called EU wants to protect the 'little businesses' and the 'little people' from these copyrights. Of course, what else could it be? That the old hag Merkel is scared shitless that her tribe is being found out and when she saw Le Happy Merchant, she just shitted her pants?

If you upload from someone else, then Jewtube will have to filter and/or censor in undefined ways. This will also affect normal people and normal channels a lot, but as to how it will affect 'us' here, it doesn't matter, because we do not really exist on their 'platforms' anymore

The above aside, what the enemy is also working on, is advanced ban bots that will just censor and ban people online even from comment sections. This was done for years now, but what they hope to achieve is some sort of 'cleverer' types of bots.

To name an example of how this could possibly go, there are places like 4chan and other websites, which may be internet bio-hazards, but they also provide a lot insights. It's a chaos place type of thing out of which many good or awkward things arise. People there, use memes incessantly.

Now, if 4chan was in Europe, what they could impose on them would be to "find a way" to give "copyright holders" their so-called shekels, or if they can't, shut it down, and so forth. Alternatively if the EU goes full commie mode, they can be like "n0 wE cUnT b AlloWinG DiS ShoAh to happ1n, 4cHan AccEesS close DAWN fur EuropEan cUz MuH little Bindess goyrights".

The legislation itself is so unclear that it doesn't even specify even if providers will have to put giant censoring machines to make sure that the so called "Copyrighted content" doesn't even get "uploaded". This may sound like overkill, but this is where the enemy wants to progressively bring the internet. It will be as plastic as European Free Speech, and as Talmudic as Television Talmudvision. They want to turn the information projection of the internet not from all people to all people, and to all directions, but from their nomenclature to their mob serfs worldwide. Changing channels but seeing only BuzzFeed and CBS all day long.

There is a war going on from this subject where the enemy can really fuck up, big time. As they fucked up with their media global machinery, and they also fucked up with the obvious censoring of the WHOLE right wing, if they fuck up even further with the above, this will send up a message of red alert even to the NPC types that the whole game is not to their benefit. Plus, these types of laws tend to backfire mercilessly.

The more the enemy is losing or senses they are in danger, the more they will push their agenda. At some point, it will be evident even to the most NPC type of people that something really bad is going on. The enemy is past the ability to cover effectively now, which means as they push, they will experience huge backlash.

Doing the RTRs and information war guarantees the above. We have to keep it up.
