Satan is also called the Accuser of the Jewish people, in their Bible. Why? Because Satan observes the evils the Jews do, and punishes them for it periodically, but is also centered in their destruction.

Because the Jews want to project this differently in their fable, they say some allegorical stolen crap about how Satan gives 'word to God' in order for 'God to punish Israel'. Obviously 'God' here is nothing but an energetic force that is operating in the universe, and the Jews know it as well. This is a metaphor that the inner circle of the Rabbis knows very well.

This doesn't mean that Satan gives word to the enemy Jews, it means that Satan manipulates "God" (aka the universal energy) to 'accuse' and punish the Jews for their wrongdoings. Smaller versions of such "Satan" are Kings, spiritual enemies, and any other enemies of Jews alike, all of which, "Accuse Israel".

The escape of this "Accusation" (or Karmic drawback, however one wants to call it) the Jews try to mitigate by doing numerous blood sacrifice rituals, and specifically the cursing of Azazel, which they admit is also a major hater of the Jewish people and one of the crowns of their enemy beings, who also wants them to go extinct.

All Jews are aware of this reality and this is why they say that they are at war with Satan, the "Klipoth", the "Anti-Messiah" and so forth. The whole of Judaism is created around 'silencing' the 'accuser' and destroying Satan, while escaping the judgment that the Gods want to throw on Jews. As I think some Roman philosopher has stated, the Jews are a people that hate the Gods.

The reason they hate them is because they know that they are real, and they know that by their crimes they have permanently agitated the "Demons" (Gods of the Gentiles) against them. Accuser also means judge, in that Satan observes, with his limitless capability to do so, the wrongdoings of these people, and what the Jews cry about, is that they are delivered punishment from that entity.

All empires who have ever crushed the Jews, have all been created by the "Accuser". In modern politics, Hitler has been the material accuser of the Jews, who has revealed them again in plain sight. As such Hitler is recognized as Armilus or the Antichrist. For the Jews, Armilus relates to Romulus which is basically relating to Rule and the Roman Empire, which is the White Race. Romulus and Remus were the creators of Rome, which the Jews tried for tens of hundreds of years to destroy. Romulus, which is the animating spirit of Rome, is actually Armilus in the Jewish writings.

Armilus is also related to Ahriman, which I think has been mentioned before, and this also relates to Ahri-Man, which is Ari-man, and this literally means "Martian Man". The jews call the White Race the sons of Ares, which was also the title for the Spartan Elites. On the other hand, Ahriman also relates, most probably, to the spiritual root of the term "Aryan". Aryan comes from Areios which means literally, Man of Mars.

And Armilus is the living incarnation of Satan in the flesh, which the christians also call the antichrist and, and so forth.

Armilus is directly related to Amalek, the White people. They are angry because in the bible Amalek and others have attacked them and punished them in the past for their wrongdoings to everyone else same as "Amalek" on their own. Amalek is Satan's seed.

Also, it's believed by some, that the Aryans, before they came into this planet, they had colonized mars, which was nuked by the same aliens that are behind jews right now. In whatever case, one doesn't need to get into space theory to understand where this is going. Mere Roman vs Jewish history explains this thoroughly on its own.

Satan, except of Accuser, is also a general term for "ADVERSARY". It's their first adversary. The jews also say all anti-jewish tendencies come from Satan. Which is true.

The 'Promised land' of the jews is when Armilus and the "Accuser" are finally removed from the world, aka, where there is no longer a judge for the jews and when the jews have ultimate power to annihilate humanity as they see fit.

They simply code all these things in fables but pass them down in clear meaning, sort of like many other Ancients did. But the difference in the jews is that their religion is actually their social, political, and general policy of existence. So, the above do not constitute just fables, but actually, show what the jews are about.
