*"Excellent, thank you! I had wondered for a long time why reptilians are evil, but serpents are Satanic."*

---

In the UFO and racial species "Classification" scene, there are many people who are trying to find names for what they consider aliens. Generally, because it was easy to remember, we called the things that correspond to "reptilians", as "reptilians".

This is because their features represent some reptiles that we have on earth, and because this is easy to remember. They seem to be not associated at all with the species of the earth that we call reptiles any more than a "Grey" is not correlated to a bucket of grey wall paint color.

There are some theories that Reptilians evolved from dinosaurs, or at least related to Dinosaurs also in the UFO community, because they say that these two look alike. Given however the reptilians lie that the "earth belongs to them", even though they showed up very recently [Ancient Civilizations were here before them and already ruled the surface of the earth], this may be another lie that is created about them.

We call these things "reptilians", but this is just poor language choice on our behalf. Because there has been no other name, we also call "Greys", in association with the color "Grey", which people have seen in Astral projection and physically to be the color of their diseased skin. But they aren't "greys" but some other unclassified form of life.

Some material of the UFO community does something which is to correlate them to "star systems", such as those of for example, Zeta Reticuli or something similar. Be it that the enemy is also heavily disinforming, there are also lies in these classifications.

Meanwhile the UFO community says positive things about Greys, from Zeta Reticuli, or others from "Pleiades", because they espouse the same globohomo theory apparently, related mostly around weed, being a lost creature, and being a retarded drug user. Big Yay for culture in the 21st century I guess.

Knowing them by their work, these "Greys", "Pleiadians" and all these factions, do coincidentally appear also to promote burning your brain from weed, race mixing, always misguide people spiritually, and generally are a symbol for nothing truly spiritual.

A lot of people in the New Age community that "follow them", generally receive nothing but insanity, and their morals are only a replication of the programs that these hostile species seeded in mankind, sort of like Christianity 2.0 in a New Age update. This creates a mass of retarded people, and even this should be enough to show people that these aliens don't mean positive business to humanity, at all.

Well known Ancient Civilizations did worship and turn their most important monuments towards Orion and Sirius, and also Aldebaran and other places. From these places especially the Egyptians reveal that they have received the supernal spiritual practices, and the true spiritual knowledge.

Today we are called "Orion" is filled with evil reptilian creatures by UFOlogy. But the reality is ORION is from where THE SERPENTS, i.e., our Gods are. Not from where the "Reptilians" are.

The enemy uses the word 'Nahash' which means 'Serpent' in their hebrew lies, to describe Satan who came down and gave humanity knowledge of "good and evil", and the "tree of life" [Immortality].

The enemy made a false interpolation here based on stupidity to relate the "Serpent" to the actual living enemy aliens that we call "Reptilians".

The "Heavenly Serpents" was a common title for our Gods, which have nothing to do with the "Reptilians" of the UFO analysts, but rather the Risen Kundalini energy. There is no depiction of any Ancient Civilization about any "reptilian", because simply these people did not communicate with them since they were an enemy faction.

The descriptions of the aliens that have been helping humanity have always been of "Humanoid" stock, and they appear commonly as "Nordic" based on our present classification. They generally always appear as having the same form as humans.

However, the jews do openly claim they are in collaboration with the species of that we call "Reptilians", are all hostile to spiritual development, and allied with the race that we call "Jews". The inner core of the enemy associates with these "Reptilian Angels" to manifest their visions on this world.

Back to the argument about the relation between Reptilians and dinosaurs, they may be of the same general species, but they appear not even related to the dinosaurs. They don't seem to be from here at all.

Reptilians is like saying "Humanoid". Something that has a human form can be a "humanoid". What the fuck it is, nobody knows really, because it came from another system altogether. Maybe in their system they call them natural fuckups. There are many "factions" which are "humanoid", but that does not necessarily mean they are friendly or "same" like all other "humanoids".

Earth species of reptiles, snakes, lizards, or even the dinosaurs, probably have few things to do with this alien species that we have named "Reptilians".

The above connection was drawn by stupid people who don't view them as really alien and just conflated things.

However, there is something important here and that is the laws of correspondence between features of a species and its essence. The fact that reptilians have features, such as those that relate to predators or other reptiles of the earth, may relate in an evolutionary manner in their observed lack of compassion, or how unfeeling and artificial they might be.

This is like how species can have fangs. Fangs do evolve for a reason, and this reason is attack and defense. If a species has fangs, they have to be there for a reason.

Greys on the other hand, except of the color grey which generally in species that resemble humanoids, shows illness, do have other features that show a lack of personal individuality, such as that they are all the same.

Their lack of a reproductive system also shows how they are hateful of humans, human sexuality, and pleasure, or at least very alien to them. Since they do not need to unite with another of their species of procreation, they can be artificial, and are clearly cold, unfeeling, and have no empathic emotional character.

They also clearly don't understand the point of "difference" between other species since they themselves have none.

Given the case is that 99,9% of species do connect with another of their own species of procreation, this also makes them a very specific type of species, pointing to the fact that since they have no freedom of procreation, that they are a generated borg race.

Finally, a major lie of the UFO community is how these species can be "friendly" or how this state that they are is "ascended" or even "positive". This is only a manifestation of total fall for a species. They are thoroughly ugly creatures. The fact people recoil, should say a lot.
