Greetings to all of our Satanic Warriors.

Needless to say the war has been escalating on many fronts, some of which can be taken as negative, and others of which are clearly very positive for us. It has been stated before that all of us here should be prepared, aware, and in knowledge. To explain that, consider how in the last month many have been in lock down cities, and who knows what else. People who were caught unprepared in this, are experiencing major problems, but our own have received a very early warning.

The Gods care. Also, our Gods will protect those who act in mindfulness and awareness, and those who try to assist themselves.

It is not a secret, as I elaborated in a past post in regards to the spiritual warfare is heating up and entering a new stage, that the enemy is terrified, and they have attempted everything they could to disrupt things for the world, and cause problems, especially so before fundamentally good things are going to manifest, better for everyone else, and terrible for them.

The situation will definitely escalate. This is only the beginning. Those who live in Coronavirus affected areas understand now and have understood for weeks, what "Disruption" really means, and how easily the enemy can wrestle people into fear, or lie to people. The enemy is clearly in a form of panic over the whole situation, and they have every right to be.

They have also tripped on just about every stone they possibly could along the way, revealing lies, deception, incompetence, lack of care for the people, and many other things. People see this and sink this in, and their belief in the enemy breaks permanently.

For one, this highlights many weaknesses in how they have built the economy, which appears to be built very fragile and very based on strange patterns that prioritize theft over survival and over care for the citizens of all financial ranks. Fragile economies cost people their lives. The enemy has always treated the economy as some sort of joke primarily for their own benefit, and making theft legal. This, manifests in broken economies that cost people their existence over and over again.

So that the USSR leading party would have all of Russia controlled, they designed a theft based economy where the Communist Party of Russia and a few individual jews owned everything. This costs tens of millions their lives, tens of millions lived in permanent parasitism, and everyone else in serious deprivation. In a similar situation

today, the whole world was relying on China, and China was willing to sell its own people for what would be everywhere else slave labor. This has now backfired and the world took a giant hit.

With lies, especially those of the enemy, they can stand as much as their clay feet can stand. But it only takes one blow to their clay feet and the whole giant monster collapses really easily. Now, we have dealt many blows on their clay feet, and if this continues, the whole monstrous zombie will come down.

Other chaotic events such as the "migrant" influx [For accuracy, let's just call it Kalergi Invasion to Replace Europe Fast Because Jews Are Scared Shitless Influx], have hit such a bone, thanks to the RTR's, that people, especially Southern Europeans, finally revolted against these. Now it's to where the people who are pro this have to be below 5% of the total population. The Jews have always ruled with corrupted and evil minorities, them being 1%, and their cohorts being the rest of the 4%.

The people were never asked if they wanted to be replaced in their homelands while they paid for this in fat amounts of tax money raised up in "Socialist" countries as much as 70% and 80% of one's total income. This situation, aside many others that hit the clay feet of the Jewish giant, came to a critical point. People were starting to be replaced materially in certain Greek Islands, and in certain places in Italy, one cannot find an Italian in a whole town.

The Governments were forced on a reaction, because the masses were so fed up, they started fearing for their own lives. This fear is both terrifying, but useful fear, because this breaks the coma sleep of the people. The RTR reassures this situation will help people awaken themselves. Maybe not fully for many, but as much as necessary so that the enemy is successfully dealt with and humanity becomes safe once again. For once, the whole influx has stopped, and is gaining global attention of being the death of our species, and nothing "Humanitarian" behind it, but only a mere full blown invasion to replace us.

Consider this also, many people are leaving Christianity and Islam in droves. In Europe, hardly anyone believes in Christianity anymore, in any real way. The dreams of three centuries before, when people like us waged wars against Christianity, are starting to bear fruit now. And the reaction of the Jews to that is to fill Europe with radical and hardcore Muslims.

What does that mean? That for every progress, the enemy will do their earnest to hit back and kick back. This is no different than how one disinfects a dog from ticks. The ticks, when they understand they are being removed, they bite the hardest, try to hide, and cause the dog to scratch, or due to the excessive pain of biting harder, they try to make the dog run away or panic, while he is indeed being healed out of his long curse and illness.

The masses now know a lot of things, but we aren't to the full extent of this yet. How this ends is not with blame of Globalists and other things which we have successfully manifested. This ends with the full manifestation of the enemy taking the full responsibility for all they have committed for centuries.

This knowledge, thanks to the RTR's, has shifted it's way through the masses, who are no longer oblivious of jewish and globalist motives and patterns of action. The people used to be totally oblivious but not anymore. This change of situation, despite of all the sincere efforts of the enemy to censor and destroy their intellectual opposition, shows that they have lost this game of lying to people about their plans for the world. From now on, it's a matter of time that fundamental changes arise in society.

We keep up the intellectual and spiritual warfare, and our side has done extreme achievements to the point the enemy has been hit hard. Now, however, is the time to hit them even harder. Just consider all the damage they have done to humanity and all people irrespective of race, social rank, and background.

To give you one example, so many people, who have been working class and never had a little time in their life to google about their questions in life, are now in home. Many will seek for answers and they will find us. As the situation with the world escalates, many more will be seeking and trying to find more answers. Progressively, new information creates a new understanding, and we are already deep into this process.

There is no return to total ignorance from now on, only forwards to better understanding. And new understanding creates new worlds, and new relations between human beings.

Many people are also confined now, so for once, people will have time to read around. I could write a book on how golden all of this opportunity is. It's time for major SS Warfare action now.

We are entering a different era now, moving away from this era of permanent victimization of Gentiles, into the era of awareness, reaction, and better public understanding. Given that the enemy is now in dire issues, it is only an opportunity for the most decisive battles.

We are going to keep up hard on the warfare, and advance our side exponentially during this time.

Stay strong fellow SS, It's time for major victories.

HAIL SATAN!
