

200 Years of Failure of Veganism

Vegetarianism in the western world was originally what we now call a vegan diet. The first vegetarian movements happened in England in the earlier part of the 19th century. So what happened? Why does vegetarianism now permit eggs and dairy? It is very simple. People did the vegan diet, and they couldn't physically sustain this, so they started having to add in animal products to be healthy. The vegetarian movement was a Christian fundamentalist movement because the Bible states that veganism is healthy.

What we call a vegetarian diet in Hinduism is just dairy and plants. This is from Jainism, not the original Vedic society in which the social texts openly state that people ate meat and drank wine, which is taboo in Hindu culture today due to Jainism and Islamic influences. The ancient Vedic texts mention Jainism as an enemy ideological movement that was in constant conflict with the original culture, with a goal to remove spiritual knowledge and bring in a communist style ideology. Even the Shiva Puranas have a cautionary tale about Jainism in which the Ashurs are brought down from leaving the original Vedic culture and embracing the spiritually destructive path of Jainism, which was created to destroy humanity spiritually and physically. Jainism forms the core doctrine of the Christian gospels, as is mentioned by scholars. The Shiva Purana mentions that this ideology went west into the Near East. It also mentions that modern day Vaishnavism is just Jainism. They are the ones who promote vegetarianism the most.

The Shiva Puranas mention that the Ashurs are tricked into a vegetarian diet by the Jain subversives, which makes them weak.

If one studies the history of vegetarianism in the west, one will see that it caused people health problems. The people on a strict vegan diet suffered major ill health and died earlier than people of their generations. Children had major growth problems and ailments that only went away by eating animal products.

In the 1940s, Watson, who was a member of the major vegetarian society, simply reformed vegetarianism back to its original meaning and shortened the name to "vegan" for such reason.

After 200 years in the western world, the reality of this diet is it simply does not work. Today what happens is that people go on this diet for a couple of years and use up the reserves of animal products in their system, as the body is designed to do to keep humans alive during periods of scarcity. Once this happens, they hit the wall physically and find out the supplements don't work. Many get to the

point where they need B12 injections for absorption rates to be enough so they don't fall ill and risk other dangerous situations, which can be fatal from lack of B12. Children raised on a vegan diet have been put in wheelchairs from the effects of low B12. That is just one supplement issue.

The vegan claim is that animal products are unhealthy and make you sick, so you should go vegan and take them all out of your diet, and here are the supplements you have to take and hope they work because you will get sick and possibly die without animal products in your diet.

Notice the truth right there. Animal products are not unhealthy, and it is unhealthy to not have them in your diet. Where are all the ten year or twenty year vegans? They are as rare as Bigfoot sightings. There is a reason for that. After thousands of people have tried this diet, it does not work.

After a 200-year failed experiment, what more do people need to understand?

Notice that Christianity pushes vegetarianism (veganism). It is there in the Garden of Eden tale, in which humans are the ultimate slaves of the enemy. They are just naked animals who, as the Bible states, work for "god" only. The enemy is instructed that this garden is their paradise only, when the Gentiles are all slaves to the Jewish race and work and slave for them as animals. They hitch you to the wagon and put you in the barn: It is a global animal farm. The enemy is instructed in their Bible to put the Gentiles on a vegan diet as part of this enslavement, hence why you usually see a Jew promoting veganism to Gentiles.

The Gnostics, who were Pagans cloaked in Christianity to avoid being murdered by the Church, warned that the Bible is the occult blueprint of the enemy. Jewish Demiurge forcibly removes spiritual knowledge and then physically enslaves humanity. When Christianity fell out of the vegetarianism movement, they just replaced it with secular Christianity, which is Marxism. Today the Jew, who is the father of Vegan ideology, is a Marxist-named singer.

Both Christianity and its twin of Communism push veganism real hard. The Jews have been on an onslaught, pushing veganism lately. It's getting militant and even worse.

Human beings are omnivores.

By industrial factory farming, horrific cruelty is inflicted upon innocent animals by these places, that are owned and operated by Jews. The Jew creates the problem, provokes the reaction and pushes the solution, in this case, veganism.

This is not to say one should go light on vegetables. Vegetables are also essential and very healthy, but one needs meat as well.

It's a sad fact that all of the food these days is contaminated with chemicals, pollution, and related. Both meat and vegetables.

As our food and water supply are contaminated, the Jew further profits by charging extra for organic, water and so forth.

I also want to add that if human beings are herbivores, as the Jewish media tries to claim, lies

pushed in books on yoga and such, then why do we require vitamin B-12 which is lacking in a vegan diet?

A lack of B-12 causes anemia for one. Anemia results in extreme tiredness. This is typical of the Christian and Communist programs, as one's resistance to fight back, and to think clearly when besieged with lies is broken by continual fatigue.

In addition, compulsory fasting also breaks the will. The Christian Churches have always pushed mandatory fasting. On the other side of the same coin, Jewish communism always and in EVERY communist country, took control of the food supply and created artificially induced famine to break the will of the people.
