

Alex Jones

It is well known that Alex Jones was banned from several major social media platforms under the reasons of far leftist Marxist, ideological Jews speak. What are people thoughts on this? Sargon's video on the subject was well done in my opinion. He also showed the obvious fact that the Marxist left does not follow its own morality because it is just a cheap weapon against its enemies.

Note that Jones was banned at 3:00AM from one platform, and this is a Kabbalah number and timing. While I don't care for Alex Jones, I do however believe this might be the attempt to purge any opponents of Judeo Marxism from any media platforms. If they succeed with this they will probably start going down a list of everyone else.

However the enemy has already been doing this to smaller names for a while. Another possibility is that they are going after Jones as test for reasons mentioned and to make him seem like legitimate opposition within their false left-right narrative. Jones is a Zionist pusher, which he does not even hide. He also covers for the Tribe all the time. He first claimed that Hollywood is owned by Arabs, and now the Chinese. While the Jewish press brags, Jews run the whole thing. Weinstein sounds like a very Chinese or Arab name. Jones also threatens physical violence to those who have called in and mentioned the Jews.

However, one thing this will cause is the further exposing of the enemy's control over social media, giving more power to new social media sites that permit free speech.

It seems the Jews might be throwing their own under the bus.

It is for certain the jews are going through a throwing under the bus phase for all their buddies again at this point even the soft right. They cannot even take their own agents.

Jones tried to be a gud goy boi with the jews but they didn't seem to appreciate this either, which is to be expected.

The media is terrified even of Jones, which shows they are pathetic.

This will also ruin Jones financially, they attacked him directly to go for the kill here.

Tribe or not jews don't give a shit either, it's the same old.

Also this may be simply related to some random banning (maybe Trump is behind this) to agitate the Republican voters for the Midterms and 2020. To become more vigilant. The GOP needs quite more Senators in the White House to get things done in the future.

Jones is famous he affects tens of millions in America.

Also yesterday I've watched "Mission: Impossible - Fallout" at the theaters and right in the begining of the movie, Jerusalem, Mecca and the Vaticancer exactly are saved from nuclear explosions by the good goys agains the "anti-religious extremists". It makes me wonder the kikes are on a kabbalistic desperate rampage as we progress in the final RTR"

The Jews who control Israel want to juke the Mecca in a war with the Arab Islamic world so they can then destroy the Arabs and the Dome of the Rock and built their Third Temple which they need to have to create the Messianic world order of theirs. Their Torah tells them to attack the holy sites of their enemies. The Joos have built that massive juclear assenhole of theirs for one reason: To destroy the entire Arab and Persian world so they can then build their Israeli Empire in that region.

This is the job of ISIS, which is run by Israel. There were preaching that the Islamic holy sites have to be destroyed as idolatry. It is probably so Mossad can then destroy the Dome of the Rock while blaming it on something like ISIS so Israel doesn't take the heat. Destroy the entire Arab and Persian world so they can then build their Israeli Empire in that region.

Alex Jones attacks us on so many fronts with his things, he is not worthy to be looked upon not even as our most remote 'buddy' or 'ally'.

There are Jews who at least don't have the nerve to attack us as much as Alex Jewcy does.

He constantly attacks Satanism, constantly defames us, constantly reinforces all the typical Xian memes, and constantly attacks every group the Bible wants attacked (ie, Gentiles, such as random "Muslims", random gays and lesbians, random White people) and always keeps his own house (the Jews) protected. Not once has he mentioned the Jewish menace and gave them the least amount of responsibility for all their crimes.

The downing of Jones might be a big operation of data gathering. For example, for those who will visit his site, for those who will download the app from the Apple CIA store and so forth. These people can be put on a base for filtering later.
