

# Capitalism, Communism, Christianity - Cohen Control

Cohen is the name of the Jewish Rabbi leadership.

Capitalism has been best defined as state-sponsored usury. The Jewish Rabbi, Karl Marx, defined Capitalism as the religion of the Jews. If the Communist system were to give all ownership to the party state, then you would have a synthesis of pure Capitalism and Communism. In State Capitalism, the Jews control the state. Communism, like Capitalism, is globalist. The Communist movement is just the finalization of Jewish control by ownership and the liquidation of all Gentile wealth into the hands of the Jews. Fulfilling the messianic promise of the Torah-Talmud. The Jews shall have ownership over the whole planet and all the wealth of it. Gentiles are considered animals in the Torah and put on this earth to be under chattel ownership of the Jews which is part of the wealth promised to the Jews. The Torah states that only Jews are under the category of People and Human, and Human rights don't apply to animals.

Capitalism ends with the liquidation of all wealth into hands of the Plutocracy that incorporates as the state in a global situation and takes control by ownership. Why do you think the Capitalist philosopher, the Jewesses Ann Rand (Rosenbaum), promoted this ideal as the ultimate outcome for Capitalism? A Global Plantation State, run by Jewish Plutocracy. In her words, all races, nations [except for Israel] cultures, and even the family unit would vanish. Only cosmopolitan consumerism would exist on a global plantation state. Why did Rosenbaum hide her real name? For the same reason Trotsky did.

The New Testament, as I have written about before, is designed to establish this outcome for the Jews. Let us look at how Capitalism really works as state-sponsored usury. The Torah tells the Jews to use money lending (usury) as a weapon to conquer the goyim and make them bonded slaves to the Jews. The New Testament tells a person that they are born in the DEBT of sin, and they must pay their entire lifetime. That they are here on earth only to labor and toil for daily bread and pay their DEBTS, which is the cycle of usury. Nothing more than slave labor. A worker, a consumer. In this world, the state is God, and within this, the family unit, national unit, racial unit, and Gentile cultural unit is all dissolved away into a global universal plantation state where the majority of the population is reduced to chattel slavery by force and have no identity other than Christian, Communist, Consumer.

This describes Jewish Communism, Jewish Capitalism and Jewish Christianity all at the same time. The three C's of control on a planet that marks time in BC and AD.

As for the Christian arguments on this subject, Christianity allowed for Jews to use usury but forbade this practice to Christians unless they paid an expensive license they couldn't afford. By ensuring that Gentiles could not economically compete with the Jews and their usurious Capitalist system, all the wealth and property fell into the hands of the Jews with ease. With it, control of the goyim by ownership. Banning usury for one but not the other ends with a monopoly that holds one under the control of the other. The Jews quickly stole the wealth of the goyim with usury rates of up to 84%, which quickly enslaved the Gentiles into DEBT slavery to the Jewish owners. With this wealth and power, they then finalized this control with Communism. Total ownership. The Three C's of Christianity, Communism, and Capitalism, are two C's: Cohen Control
