

# Egypt And Christ-liars

In ancient Egypt, one of the names of the Serpent God was "Asha Herau". Asha means "Eight" and Herau means "The Rau". This relates to the map of the 13 major chakras, which form the eight-fold star that connects to the Rau, the solar chakra.

However the God RA's titles and descriptions and appearance are the symbol of the Philosopher stone of alchemy. This is why He is shown in the color red and His name is the mantra of fire "RA". This is the spirit within the matter that sets one free spirituality.

Alchemy is the spiritual science of ancient Egypt. AL-KHEM is the ancient name of Egypt.

The ship of RA is the symbol of moving this energy through the chakras, the water being symbolic of the serpent energies flowing through the soul. RA has the Paut, the nine Gods upon His ship, which represent the nine major energy points along the spine and the brain, such as the nine worlds on the world tree.

It is the God Set who guards the Ship of RA and defends it from evil forces. Set in the ancient Egyptian hymns is called "Father of the Gods" and the God of immortality. The attempts to create a Christian narrative out of the alchemical mythos of the Egyptians are just not there. These are texts about the transmutation of the soul. Set is honored as the key to alchemy all the way to the Roman period before Christianity destroyed the original cultures.

"Father of the Gods" is alchemical terminology. It means the gold within the metals, or chakras. Set represents spiritual gold.

Set is Sat in the ancient language. S is fire, A is spirit, and T is earth. This title represents fire purifying the soul and body and uniting it with the transformed spirit and body. This is about transforming the elements to gold. That is why Sat means enlightenment. Set is shown as relating to the alchemical inner fire that transmutes the elements to spiritual perfection, which is why Set guards the Ship of Ra. Set is shown defeating the forces of death and suffering and spiritual ignorance, which liberates the soul.

Originally, Set baptizes Osiris in the Nile, in which Osiris undergoes a transformation into an ascended being three days after. This is the energy of the soul being taken to a higher stage where the fire of the soul opens the chakras and nadis fully to the cosmic waters and causes the dross to be cleaned out of

the being, generating the full Light Body. In ancient Egypt, the Nile river was the symbol of the serpentine Goddess, the flow of energy through the spine and chakras. Set is the alchemical power that takes the soul to the higher state of enlightenment.

What has happened is that Christ-liars have come in and attempted to graft their own cultural conditioning and lies over the template of Egyptian texts to create a false narrative to conform to Christianity and thus give a false credence to Christianity. This is done on purpose in many cases and is nothing new. The Church was altering and forging false history from the start for this reason. There have been entire worthless books written by Christ-liars to attempt to claim that the Christ-lie was the religion of ancient Egypt and India. It's literally just worthless trash. The Christ-liars have spent thousands of years destroying Egypt and India.

Now what would have happened when they started digging up ancient Egypt, which the enemy tried to destroy and remove forever, leaving only Jewish fables about rabbi Moe and his magic stick in the Lieble of the Bible? When they all of a sudden find Set, whose name is also spelled STN in Egyptian because they didn't write with the vowels? STN is SATAN.... And they find that this SATAN is the father of the Gods and the head God of ancient Egypt originally, and is not an evil being but a good one.

That would have flipped their world of lies upside down!
