This is my reply to a thread in the Teen group, but I am reposting this to all the groups and the forum, as it is something to be aware of:

In addition, the Jewish controlled medical association is pushing hard for the population to be addicted to psychiatric drugs. Who hasn't heard of Prozac?

On top of the trillions of dollars these Jewish doctors, Jewish pharmaceutical companies and Jewish related reap from these drugs, the Jewish media incessantly pushes them.

Television commercials, magazine ads, in the newspapers, online advertisements and of course, their movies with the theme of mental illnesses in the characters.

I have seen several of these movies where the characters reach into their medicine cabinets for those little copper colored prescription bottles, often the shelf is lined with them.

The characters in these movies also have trouble discerning reality from delusion. This often is the main plot. This ties in with the pharmaceutical commercials and everything else as powerful subliminals to encourage mental illnesses among the populace. Not to mention we live in a sick world.

In the former communist countries, especially in the USSR, there was what was called "Punitive Medicine." Anyone who was a threat to Jewish communism was often forcibly placed in a mental institution, shot through with dangerously high doses of mind altering drugs for psychosis, such as haloperidol (commonly used), which produced hideous side effects.

Note- anyone who is against the Jews or their agenda is labeled as "insane."

Again, I want to add here, "People's" as is used synonymously with communism, is "People's Republic of North Korea" etc, has the word "Chosen" dropped. A rabbi authors have admitted this. As is written in their Talmud, they own everything.
