

# A Secret About Satan's Name: Satan is God

HP Hooded Cobra 666

[September 22, 2022](#)

Father Satan, will soon rise in the future as the undisputed Truth of mankind. In the end of this, it will look very obvious, but currently, we are exiting an era of atrocity and lies done against Satan.

The very name "Satan", who jewish researchers and Zionist worthless souls decided to slander, is one of the holiest words that have ever been conceived by the human tongue. The Name of Satan, is the real "Name of God" and the Name of the Supreme Deity.

In Sanskrit, this is very well understood as a known fact. The Indo-Aryan and Sanskrit culture that is connected, inherited from, and created by the Gods, reveals the power of the word Sat and the word Satya, relating them to the Truth.

When Yogi Bhajan decided to move forward with his giant revelation so that, as he put it, "to accelerate dramatically the Spiritual Evolution of humanity", he related the "Top Secret" mantra in the East which was known to the Brahmins as SA-TA-NA-MA.

This Mantra is now the most popular in Eastern Yoga.

Funny enough, the enemies of humanity and all spiritual development on earth, have coined a derivative from this as "the lord of darkness" and coined Satan in Hebrew to mean "The enemy", ie the enemy of the jewish people. Just how innocent are they?

Other words they desecrated involve the holy word "Demon", which means "Knowledgeable One" and literally "God", but also to become a "Demon" was the point of the mysteries of the past.

As I explained in some updated Joy of Satan pages, many of the "Demons" are actually human beings who have ascended into the Godhead, and they are advancing higher and higher. They are guides and protectors for humanity. They have their categories, levels and offices [more on this will be updated in the JoS].

As Rabbis and the jews go into tantrums that humanity is returning to their Ancestors, which basically, we call "Demons", it is imperative to not stay on this subject but to bear this in mind until the final point of this post is reached.

The theory that HPS Maxine ended her research at, was also believed in the last century as the "moving of the Great Race" towards the East. The Hindus there know this was the case. But I would like to take this one step further and say that...

"Before" we were in the "East", we were already in what we call the "West", "Europe" and the "Mediterranean". All of our history did clearly not begin that recently whatsoever.

The Ancient origin of the people of Satan extends further back, and on the light of new information, I am inclined to not even believe that Sanskrit is the "primary" language, but rather, that it took from another primary language. Regardless, it maintains a highest degree of importance and holiness because of its source.

I say this after having studied in depth the rules and regulations of Sanskrit, what has survived from Egyptian manuals, looked into Babylonian [Assyrian/Akkadian too], surface studied Latin, and so on, I have reached certain conclusions I would like to share which are of penultimate importance. But that will be done gradually.

The strong links between Ancient Greek and Sanskrit, point to me to these two as the sister languages very close to those of the Gods, and I am also furthermore inclined to believe, that all of the false hypothesis of "Phoenician as the source of language" is merely more Jewish lies to cover up how far our prehistory goes.

Regardless, the Phoenicians are mentioned by Ancient Greek historians to be literally Greek, and even knowing this, modern linguistic historians have to lie. Or maybe they do not know because they simply do not care. Other, more cryptic transcripts of languages from the Minoan Era, do point me to a history larger not only than initially believed, but also larger than what we have 'conceived'.

What is even more obvious, is that the carryover of meanings between the two AND Egyptian, prove beyond any shadow of doubt, that Father Satan is really our ancestral God and the Father of Humanity. This is the key central point I want to relate here, as Language hides in it information and meaning.

All of these languages are known to have divine origin, and for all three, the God Thoth/Hermes is credited for their creation. Modern day languages have been largely watered down, and contain few or any important or powerful elements.

Pretty soon, the enemy wants to turn us into monkeys that use extremely basic "language". Through this, our brains will gradually shrink and less and less synapses will be working, rendering us completely retarded.

Their assault on English and any language people use, the forced "simplification", and the "if it's not English it doesn't matter" mentality, will put a tombstone on extremely important languages which extend all the way from the Ancient Norse, to Sanskrit, to Egyptian and of course Ancient Greek.

I am also entirely sure that if other languages will reach proper discovery, we will find even more shocking things as time goes. I am currently uncertain about the validity of more than a few, including the claims that we know "Sumerian". I think we need a lot more work in that regard. Geniuses that could work on this have been impeded from doing so.

Who knows what we might find?

We must also remember, that even Sumer and other civilizations were discovered "Recently", and that not only that, but the jews have impeded every serious research into Civilizations that they boast fell or their alien hive tried to exterminate, such as the Babylonians.

In regards to the Babylonians, the Jews have stolen an extensive amount of their language from the Babylonians, and the people of Chaldea, and then Egyptian, whom they also have the nerve to attack and defame "in damnatio memoriae" while their books "curse them for aeons to come". The time has come for them to pay the price for this and more, but that is besides my point here.

After having done extensive research on this [both spiritually and materially], I have concluded on a supreme amount of properties in regards to the real "NAME OF GOD", which is none other than written in English as "SATAN" or "SATANAS".

The curses and benedictions of the jews against that, are directly correlated with jewish efforts to "bind" Gentiles from making use of the Divine Name. We are removing these alongside everything else. But I will further explain what else they are afraid of.

Having made the above available and the previous points clear to put someone in the mindset of this post, I also want to mention one of the secrets pertaining to Father Satan's Name. There are many, and they have depth and layers.

I will progressively write more and more on this, especially in Satan's Page to add more info.

In Ancient Greek the Name would be as follows: **Σ-A-T-A-N-A-Σ**.

A common practice in the Ancient Greek System is to move the letters of a word

around, to find hidden meanings of said word. This is called "Ana-grammatism" which "Ana" means to reposition. "Gramma" means "Letter".

By applying repositioning of the letters of  $\Sigma\text{-A-T-A-N-A-}\Sigma$  , we will get another word, which is one of the very obvious secrets hiding behind the Holy Name of God:  $\text{A-N-A-}\Sigma\text{-T-A-}\Sigma$  .

If you are familiar with the above, you might recognize that actually something is looking weirdly familiar about this word. Well, this is basically the word from where the name "ANASTASIA" is coming from.

This word translates to the famous "Resurrection", because it really means "Resurrected One" or  $\text{ANA}\Sigma\text{TAS}\Sigma$ .

We know here that even the name of Rabbi Yehoshua of the Bible that was later branded "Jesus Christos" has nothing really to do with this. All this is, is another stolen title to describe a jewish pseudepigraphical story as "real".

"Jesus" is a title stolen from Zeus and the word "Iasis" which means to heal, and "Christos" means "The anointed one" or the "Initiated in the mysteries".

Up until the second century BC, when the jewish hoax has started itself, the native people must have believed in nothing of this related to Jews, who clearly heard this from somewhere and were like, "Oy vey, the goy likes that word, lets make a total fraud based on this".

For all the words they stole, and all the words they perverted, and all their cultural inversions, they fully were well aware of what they were doing. The only ones who did not know were their victims.

Father Satan's Legacy is also evidently, the worst slandered entity and the least "deserved to be slandered" entity, in human history ever. Nobody deserves glory more than He, and yet most of humanity has slandered Him because they adopted lies and hearsay from the jews WITHOUT evaluation of the KNOWLEDGE and TRUTH in regards to the topic.

In regards to Father Satan's Name, we are seeing the clear, purposeful desecration and removal of its meaning. I am relating therefore the TRUTH of the topic, not based on nonsense and methology from the schizophrenic jews, but evident FACTS.

As we all know here, another stolen Mythological Theme is that of the Resurrection, is very important, as the "Resurrection" which was stolen by the enemy programs, is directly related to returning the Kundalini Serpent from fallen

dormancy, into the state that we refer to as Risen. Then, one is "Reborn".

Without meditation and without this, there is no "second birth" as a human being remains without a soul. As we were catching out with spiritual knowledge that was lost, the enemy tried to again corrupt more and more to try to fit themselves in the present era.

That is called "ΑΝΑΣΤΑΣΙΣ" which has a dual meaning, and means "To put back point upwards" but also literally to "bring back to life". It also literally means, to "raise from the dead".

The other Name of Satan, which is LUCIFER or EOS-FOROS, is well known of being the translation of "Light Bringer".

This light, is the light of the soul when it's truly into the state of the "ΑΝΑΣΤΑΣΙΣ" or when the Serpent is risen again.

The above, is achievable through the restoration of the human soul and returning it to function, a feat achievable through the "Satanic Arts", which would probably make many outsiders or believers in the enemy dogma rather concerned right now, but merely we are talking about meditation and opening up of the soul.

The above will look like common sense in the decades to come, but now Christians are free to get explosive potty problems from the facts stated here, it doesn't matter. They are believing into a jewish fraud.

When they will understand Rabbi Yeshua and his race have literally swindled them in a nonspiritual program that is nothing but jewish pseudo-history, that slanders the real God of Life and Resurrection of mankind [None other than Father Satan Himself], you will all change your ways.

The original "God", "Resurrection of the soul", "Eternal Life", "Healing of the Soul" and all of that they are so brainwashed to believe they are "into", is exactly where they are entirely out of: It only exists in the one they reject, the primordial source that we call "Satan" and that we here refer to as Father Satan.

You can join us, or you can keep slandering it until the end of the cycle of ignorance in this Yuga finishes itself. And with it, lies will be flushed out same as liars.

To close with a final phrase: **SATAN IS GOD.**
