

Fake News, Internet Era, and Jew Propaganda

HP Hooded Cobra 666

[August 25, 2019](#)

The situation is that nowadays, information travels and travels, and jews do largely control all the information. Hoaxes travel, and jews do extensive lying. Many people are still stuck on the TV which lies to them.

The jews had a monopoly on "News reporting". News reporting should be just that: NEWS FUCKING REPORTING for the most part, without politics involved. However, that is an impossibility and we know this all very well by realistic standards. Still, being impersonal should be an aim for good reporters, but it is impossible in this line of profession.

You report what happened about an event, but what events matter and what events do not matter [or should be hidden even] are for the mega-jew conglomerates to decide. Since Hitler's time nothing in that regard has changed, and if anything, it was only intensifying until the internet era.

The fact that this was the case until now, but now, they are having a few rivals, is giving them an intense drive to destroy all other news outlets, and any other individuals that report news or dig into things, and practice similar work to that of Journalists. Free speech is the backbone of these operations, allowing people to speak freely.

The truther community and a lot of people who dig into these reported events, or do general reporting, is a problem to jews, as this creates different narratives and shifts the attention of people to different topics, which gives ability for people to be informed from other sources, or actually cross verify what is real and what is not. And this enrages the jews.

Jews claim that the problem is that these people report lies, or that otherwise they do bad reporting. Everyone who reads the news here on a daily basis, will laugh. So what makes the jews more ordained to lie to people, or give them fake news, or false reporting, and ordained joe from down the street to make his own analysis of events?

It's just the jews are crazy and guilty, so they know that the more joe and others dig into the holes of the system, they will find more and more things that are

actually threatening to the jewish conspiracy or numerous other conspiracies. Even worse it becomes when Joe and his fellows do actually find things that they can prove. For this, they not only brand the people of doing FAKE NEWS, but they also brand them as CONSPIRACY THEORISTS and other censorship terminology, to shut people down.

I listen to Kookspiracy theories every day on CNN. Why shouldn't I listen to some KOOKSPIRACY theories from Joe down the street as well? And unlike CNN, many "Joes" online do provide at least some proof in many cases. But no, we must only listen to the fables of the jews: Bible, CNN, CNBC, and the related jew created garbage.

The jews since before Hitler's time were used to just issuing a shitty article in a shitty jew owned newspaper, and this was REALITY, they were never questioned, and nobody had the ability to actually fact check anything. They just took everything they were told for granted. They had the power to create "Reality" merely based on articles, or from the one sided television, or radio.

Later on, the emergence of the internet changed this, as progressively people had the opportunity to search things for their own, and actually also control what was projected in front of them, at least to an extent. As time went, the emergence of the internet, ruined the jews and their conspiracy, as the freedom of information merely exposed them and does so every single day. The internet hasn't only done bad things to people such as internet addiction, but also good things, people can be informed and they can learn if they want to, at unprecedented rates, and even at a very low cost, almost for free.

The jews are hopelessly fighting a battle of censorship in order to effectively have two things:

1. The power of the information flow of the internet.
2. The ADDED power of actually censoring the above power for the whole planet.

Needless to say if the Jews succeed, the amount of propaganda and brainwashing that they will be able to do through the internet, if this technology is completely tamed, will be infinite times more than the era of the newspaper.

This is why you see jews from Google and all the related ghouls, so much interested in Communist China. This is because Communist China has billions of people closed in a virtual information ecosystem, that is closed to the outside world, and this is used with centralized control, enforcing an even more powerful

standard of enslavement for people. Even if one is a dissident or wants to think, or do actual criticism, they can't. Combine the above with a strong Communist police state, and you have the "Promised Land" of the jews.

However, as the jews understood the importance and the ability to also politically poison the minds of people while they do "Journalism", they couldn't help themselves but use the news as a brainwashing facility to promote their own ideological purposes against the interests of the people, so that they can serve their own political agenda and racial agenda.

Yesterday I opened channel, CNBC, and was listening to [but not watching] of around 10 minutes on commentary of Trump. Now, that is not political commentary. All this tabloid crap was, was a series of insults issued against Trump, extremely harsh criticism that one finds in the midday zone in TV, and not in legitimate news, and all they did was tabloid gossip masked as some sort of high political analysis.

Clearly, the news was a hundred percent hateful and biased towards Trump, and instead of trying to analyze what he is actually doing, or what his policy is, to inform the people and actually pull a judgement, all they are doing is they try to make the president into a clown. They say that this has to do with the freedom of the press, but the freedom of the press, as Hitler said, boils down to who its shareholders are, in which cases in all the world's big media, it's the jews essentially. As such they control all that the world is getting informed ABOUT, and also the STANDPOINT from where people get informed.

For example, in Europe, during the refugee crisis, there was a directive issued from the European Union, so that news outlets should stop reporting the migration in a negative light, or in aggressive ways, and said that this was a security threat. This was buried extremely deeply in EU legislation, where people do not have time to read any of this.

Now, this obviously breaches any sort of the pillars of modern society, one of which is the freedom of journalism to do as they see fit. The pillar of "Freedom of Journalism" is only evoked when jews need to slander political opponents, or when they are to censor people from not even making it to the public eye. They control what is relevant, what is irrelevant, and so forth.

Azazel has told me numerous times that we humans cannot see everything, and that is the reason, because we do not have enough information, so we cannot always see the signs of how much progression we have been doing by the RTR's

and everything else, which is a tremendous amount, and we must continue this. We are withheld from information systematically.

We remain oblivious. The enemy isn't going to project these in the news more than an extent, nor are they going to report the serious numbers that are required. This is because they know that reporting some things would throw oil in the fire. Despite that, few people do still do some journalistic work, but then again, that is the minority right now, and the majority of news outlets is merely politicized garbage.

Reading the news today from many outlets is merely like reading the Talmud. I was reading the news from when they were making a rampage when Trump said "Grab them by the pussy", yet, on the actual pedophile Epstein, more than half the articles I read, were always plastering the situation, treating it lightly, always giving their beloved tribesman the benefit of the doubt, and some even went as far as to extoll the jew and say very positive things about him. Half the article was about his achievements, how great and rich he was, as if the jews were ruffling their feathers.

On the other hand, the enemies of the press, will be destroyed by the yoke on the neck, based on mere ACCUSATIONS. Accusation of something means that one is accused, not that they are necessarily guilty. This again has happened with Trump. Trump is a rich man so usually, some women who feel like they have leverage, may sue him or claim that they have been raped by him. When it was about accusations of Trump, they went full throttle on him as if he was already accused.

When these accusations fall on jews such as Wienstein or Epstein, the Judenpresse takes this far more lightly, as if they do not exist. Even after legally convicted and proved to have hundreds of victims, they still praise them and write positive articles about them, as they sing songs to racial heroes from the bible that raped the "Heathen women".

We must fight for the information era by spreading information that counters what the enemy plans to do and has been doing. This is a first-time opportunity. Information changes the world, and now we can do our part in this.
