*I have a question: You said that machines serving humanity, in full or in part (which one, I am not sure you mean). Etc. Is bullshit. My question is...? What is the Satanic Method of labor and manufacturing, production and agriculture and all of the sectors of work and labor? Will humans labor? If so, may I ask what will be done (what labor will humans do) and how it will happen/will be done. Will we just have a lot of people doing work that is now taken over by machines (My two cents, is that I'm not going to have an opinion until I hear it from an HP or something. :3)*

*A quick note. What is the Satanic Stance on Birth Control? Should I not use birth control. I am a Nordic Aryan, and I know the white race needs saving. Cheers. Hail Sat-Enki!*

In the closeby future, it will be similar as of now, only better. People must not become entirely dependent on machines, as then we will go down very easily. People are already largely depressed by the fact that they do nothing useful with their life, but only chase an imaginary consumer's "happiness". Also, unemployment and sitting down to have 'fun' 24/7 doesn't serve anywhere but to weaken down civilizations and make people depressed.

In the 'happier' societies where people always try to have fun and chase the 'money' god, we have the most rampant depression. This is because humans do nothing useful anymore.

People by nature like to create, and those who are entirely lazy by choice as parasites, then why are they around? It's by parasites that humanity has been dragged to where it is now.

There needs to be a blend of fun, and labor that is stimulating and uplifting to the mind. However poverty and slavery of finances the Gods do want to abolish, so humanity can focus on spiritual attainment and advancement instead, rather than chasing pennies to live, but this will definitely take a while.

These are all pipe dreams unless we save ourselves from the mortal dangers first.
