

# Our Side and the Enemy's Side - A Cosmic Difference

HP Hooded Cobra 666

[March 22, 2022](#)

The enemy preaches that people must destroy and reduce themselves to ashes, so that whatever little is left of them, is siphoned into the parasitic vortex of no return. For this, they instate a victim and slave mentality.

That is the enemy, we all know them, and we left them, but we always wish to destroy them. That is how death occurs. People are siphoned of their existence. The enemy takes what little sun people have in them, siphons it, and allows them to die.

Father Satan, the Gods, and therefore, the JoS, tell you exactly the opposite. All of the things I have ever written, have been for growth, improvement, empowerment, the list is endless. The whole spirit of JoS is the spirit of life itself.

The Joy of Satan's instruction has always been to take your little inner sun, prevent its destruction, keep growing it, until you shine light on everything and enjoy the light shone on you. You must become fuller, better, more advanced, with more inner and outer growth in life. It is through this growth, we grow our side, one another, and everyone else.

As one can see, these principles are in opposition. Therefore, one must understand the above principle as a default principle. Everything in Spiritual Satanism, is enclosed into these sound principles of life.

Since money is such an important and simple topic that many people can understand, If anyone asked you, for a stupid example, 10 bucks, it doesn't mean to take your last 10 bucks out of your pocket and to die. The request here is to learn how to make 20, 30 or 40, to give the ten. The enemy is in full antithesis with our side.

The above, must be understood on an existential level. That is the rediscovering of one's own inner creative power, that when projected outwards, causes growth. The stagnation of this, causes a rift of darkness.

The above principle is very simple but must be kept in mind when one is on this side and why one isn't with the enemy. Our Gods do invest time, effort and energy into us. The enemy does not only not invest ANY time, they want people

to just slavishly follow them for no reason whatsoever. There is no growth on the enemy's side, death is the only option. The quicker you die, the more they enjoy it.

An example is that energy and effort of their invested from them on me, many of us do re-invest into the Community, and everyone re-invests on themselves, then they themselves re-invest in the Gods, and it all forms a circle indefinitely, resulting in growth. That is how growth occurs.

Recently, I have told you about the new plans for JoS and how this is going to happen. This is dependent on the growth of everyone. Our growth, except of something that will benefit us [which for many is the primary concern] should also be in the net benefit of everyone else involved. If everyone lived by this mindset, then we would be living in a heavenly realm.

But we live in a toxic realm instead which we all are aware of. But the Joy of Satan has to write its own history as doing the opposite. We are enemies of entropy, death, and of the enemy, and so shall we remain.
