

The United States - Pluto Return & 2/22/2022

High Priest Hooded Cobra 666

[January 31, 2022](#)

Currently, the United States is experiencing a Pluto return. It will become more active on the latter end of the February and will hold on there for a long time. Pluto return is when the Transiting Pluto is returning on the Natal Pluto, approximately every 247 human years.

Pluto will transform the United States. When the United States was founded, a plan was laid out for the Great Nation to be something great, something else, something different from the Christian oppressive Nations of Europe at the time, who were scrambling to get out of the hoaxes of the enemy.

The Founding Fathers wanted specific influences limited or completely outside of the United States, to avoid catastrophic downfall that has occurred in every previous Empire in this world.

One of these catastrophic causes of failure is not only the application of Jewish teachings in Governance [or ruling through the Talmud or the Bible] but also religious extremism, superstition and insanity, that arises out of the Abrahamic faiths.

The United States was "clear headed", way more than other Nations. Many of the causes of oppressive atmosphere were far less than most Nations.

The people who left for the United States, despite appearances, formed a Nation that was under God, not under "God". "God" in this regard, the religious superstitions and insanity of the Jewish people, was not accepted.

As the above dogma gained too much power, it manipulated people. These people, with their bleeding hearts, egopathic fallacies, mixed with the great forces of the founding of America and the plan to build the Great Nation, we are to where we are now. The United States is the embodiment of both of the greatest dreams of this world and the worst aspects of it. Decades of deliberate work to ruin this Nation are catching up with us.

Pluto is here to seal the deal and test how far now this will "go".

Pluto's return in general does not affect humans on an individual level in one lifetime, as humans are long dead before this occurs, but it affects the Soul of a human which survives through lifetimes. In humans, this is a big period of power expansion provided one cleans house. The soul is confronted with great changes, which affect all its growth and reconciliation with past wounds, debts or history.

The Native Pluto of the United States, resting in Capricorn, has to do with authority, structure, the business world, retaining borders between one's self and others, but also financial and fiscal authority. In the most accepted chart, this Pluto rests in the 2nd house of Finances. Pluto there can incur debts, financial depression, or worse, strengthen bonds of servitude.

In some setups it can spell financial meltdown or depression [for example, when one owes too much], and in other setups it can create a revitalization of personal finances, but without pain, this won't be achieved.

The United States will be forced to assess these matters. Of course, since the birth of certain falsehoods such as the "War of the Coronavirus" that was treated as a literal war, the global economy is currently bleeding on the background.

HPS Maxine has said before that the United States was very likely to enter a war in 2021. Well, we spent this year... "On the War against the Coronavirus" globally. Currently, the bill for this... "War" on a bullshit flu, is coming, in a typical Pluto Return in the Second House.

Fiscally, socially, behaviorally, all of this was the exact same situation of a war. It also incurred the same expenses as a literal war.

The world now asks, how is it going to get paid?

This has not reflected itself yet in the "numbers", because it's being covered up, but it's everywhere for people to see in the rise of energy prices, rise of everyday goods prices, or in other more evident realities such as how you need to get literally into probably insurmountable debts only to study at a university. Eventually, as Pluto also has this quality, more and more of this will forcibly come to light.

The United States is headed to a reconstruction of its whole economic and fiscal model. It is also quite hilarious that everyone speaks of a "Free Market Economy"

in the United States, but when the vermin carcass practices of financial abuse reach the highest points, everyone expects Big Mommy America Government to give them a bailout or buy hundreds of billions or trillions of stocks to bail the whole thing out.

This has repeated again and again in recent history. Then everyone expects that it's done again and again to no end. That's not how life works in general.

Eventually, the above practice does take a toll on an economy by depreciating its currency. Within the next years, attempts will be made by Nations to issue "Digital" currencies, but regardless, the financial model of depreciating currency [the more you print it, the less value it has], will keep plaguing everyone.

The jews and the powers that control the United States currently, do know that one certain way to collapse Empires is through destroying them fiscally. This is like draining the blood steadily out of an organism until nothing remains of it. They did this in the Persian Empire, and in other Empires, and they have become exceedingly good at this.

As much as I hate to be the bringer of bad news, and as much as I would like to always remind people that we will not get affected by this [and for everyone to take spiritual measures, and take care of themselves] the above return not only implies fiscal and financial turns that will be remembered for decades.

When other Empires such as the Roman Empire have been affected by that aspect, the "Old Roman Empire" started to look like a dead husk at the feet of extremely crazy and perverted leaders. Perversions and political scandals took a whole other level to themselves. While the first return does not signify collapse, the second return can oftentimes signify that something is flattened and does no longer exist - if it doesn't clear house.

The United States is like the Modern Roman Empire, in most if not all respects. It has championed freedom, free speech, freedom of medical choice, of opinion and so on. Currently, we are seeing a reversal of all these morals, slowly but surely, beginning from the retarded masses that are mind controlled by decades of enemy subversion.

As one can see, the average "American" has adopted the inverse morality than this of the basis of the Nation. Largely, this has been manufactured through the careful weaving of false beliefs, such as for example, cancel culture, "wokeness" and all that un-American nonsense.

Before this, we had Christian fundamentalism, the rule of "Christ" and all this other nonsense that promoted the same low tier brainless attack on common sense, freedoms and so on.

Concurrently, the average person's morals, outlook and therefore behaviors and "How they want to see the world" has been manipulated to change almost in an opposite direction than the Nation itself.

Insanity reigns to where people even debate if opening your borders for infinite flooding is "good or not", while it's basic logic that you are collapsing a Nation if you do that. Common sense is no longer in the political offices for 9 out of 10 decisions made.

Regardless, such stupid and asinine conversations are not only taking place in a Nation, but they are being enforced by opinion enforcing mobs, "wokeness defenders" such as oligarchical social media organizations, or closed castes of "opinion makers".

The change here is either majorly to the upside, or the downside. Pluto's transformative energy will be upon the United States and there is no avoiding this. There will be a lot of conflict, upheaval, and general instability. This will include the Governmental level, but also, rapid changes that will occur within the next decade that will make the decade of 2010 to 2020 look like a small nonsensical party.

If the United States allows itself to be plagued by specific things, it won't exist for its next Pluto return. On the opposing aspect, the same Pluto Return can actually set the basic stage for constructing a new, seemingly utopian new system of financial governance and fiscal responsibility. It might also be the first time in human history, where "Emperors" have the chance to maintain an Empire, that would otherwise collapse upon itself through intense fiscal pressure or internal subversion.

The United States has a great opportunity to revitalize itself during this time. Only if leaders had common sense now, by use of this opportunity, all that was Good about the Great Nation could be multiplied, and all that is bad could be greatly eliminated, to where in the next Pluto return [yes, I know, 247 years from now looks extreme] we would be looking at possibly an Empire that has expanded outside the earth, too.

I remain however for the time being tentative to not believe this will happen on its own, let alone immediately, with literal Jews and senile fools in power.

On the other hand, we are sitting on a crossroads. Pluto can be a considerably dangerous planet. The nature of Pluto can be really oppressive. If certain things are left unaddressed, rampant financial and other slavery can occur, all the way to real bondage and full on slavery on a material level. How, you might ask?

I don't know, just remember that some people converse about literally chipping you, and that "mandating" you to do just about anything that is not scientifically backed, is the meme of the current times. We are in the midst of a global conspiracy to overturn everything the United States represents that made it good, and it's called the Great Reset.

An example of "to be" enslavement and how this could relate itself on fiscal matters, would be for example the giving of a "UBI" that appears on the surface to give money to people, yet, would be monitored in such draconian extents that people cannot even fathom now, or related to a social credit system based on a Central Digital Banking Issued Fiat Currency. That is however, not for now.

Another example of how Pluto could work, is that the fiscal damages of the US and/or wage provisions, being terrible, a major clash between labor force and automated work force could occur, slashing damage on the Nation. That is coming, but it's being conveniently ignored.

A paradigm will have to be cleared out, on how these two forces of creating labor, human labor and automated labor, will co-operate, without destroying the economy.

Finally, Pluto can work to create clashes, riots, or internal unrest in a Nation but on the basis of conflicting interests [2nd house Pluto here] but also, the literal ideals that confound the very basis of a Nation. Wars over financial reasons are not unlikely, but Pluto in general creates more "clashes" than it does wars.

It took a little kiss of Pluto bordering the native Pluto, and the United States had to assert itself against Russia on the Ukrainian border.

The slavery of the future will be like "Freedom" on the surface, no different than how billions assume that they are free while using social media that are literally

studied to the last nook and cranny with intensive AI predictive algorithms, to bind them in the strongest addictive behavior.

Instead of using these as people should, they are in turn "used" by them.

They assume that they are "Free", but they literally bind their minds and souls into a state of fully immersing themselves and making themselves into a resource that is mined for data, some of humans giving these 8 hours a day or more of their attention.

As the "Date" above is highly related to Jewish numerology [2-22-2022, the number deals with discord], I would be certain that on the above dates and around these dates, Jews will, as they have against any other Empire, spiritual mobilize to take it down. Already, they have their foolish "New Agers" advertising the "Angel Dates" and all this stupid nonsense.

A well-known vector of danger to us all is the enemy who does curses to the United States. We know they have cursed the Russian Empire [and took it over] and they have done the same with others like the Babylonian Empire, the Greek Empire, the Persian Empire, the list goes on. They are clearly merciless in their approach.

The top heads of the enemy, both those who are Globalists and handle the worldly agenda, and the supernal heads of the enemy such as Rabbis, are conspiratorial over what they hope will be the "to-be" dead body of the United States.

Above all, they want to extinguish every foundational idea that made the United States what it is, such as erode the values of ownership, freedom of own things, the freedom to speak or the freedom to think.

Is this the world we want to live in?

The United States, even against Biden's will for example, still has had many barriers to protect people's rights from violation during the Co-Vid situation. Other countries were plunged into a nightmare over a foolish "pandemic", with their Constitutions almost becoming crap paper.

Imagining how the escalation of this fall would be in a world where systems like the Chinese or the Jewish system of "World Governance" which are reflected in the Great Reset, are looming to take over, one should not only favor the

freedoms that we have and do remain, but do their utmost so that we maintain them and hand over a better civilization for future generations.

We will do our duty in this historical time to do our Rituals and keep the spiritual backbone of the world going, especially during this time where everything good is being besieged. The enemy will be decidedly fought against.

"On another note Pluto will be conjunct and transiting a lot of people's natal Saturn right about now. If I recall correctly this can mean big changes with the older people in our lives, and even careers and living situations and relations with others depending on the houses involved as well."

Yes, currently, a lot of very old people who are the major holding of the world's wealth, are going to perish within the next decade. This will cause a torrent of wealth redistributions between these generations and the younger generation, affecting also individual households. This will also have a torrent of effects in regards to debt and global debt, because too many generations like the baby boomers have debts carrying on them, and some don't have safe loans.

Many of these loans have compounded, a lot of people owe money etc., and this will be "transferred" onto the younger generations. Warren Buffet's generation holds an immense control of wealth in the United States.

The changes of these and what I mentioned in the initial posts, will combine themselves and cause radical social and economic changes - many will be in a good direction, and others in a bad direction, but certainly all will be radical and changes that haven't been felt for decades. This adds onto the Pluto period of upheaval and change.

Please HP. HoodedCobra666 if you can, could you further explain this section?

Human beings have a natal chart with the Planet Pluto in it. Pluto has a position. For Pluto to take a full rotation on the heavens around the central axis in our solar system, it takes 247 human years total.

Most humans live around 60 to 70 years, and therefore, don't live to experience a full rotation in a single lifetime. These effects can be felt through numerous lifetimes, typically, within 3 to 4 incarnations.

Nations however do experience this aspect directly, because they can survive for hundreds or thousands of years, and they undergo these returns of Pluto on top of the Natal Pluto on which they were born. They therefore are subject to these forces more directly and through massive events.
