The Joy of Satan Library is back up in full now. There will follow other updates, same as a final library.

We have fully restored everything that has been lost, BUT, as always, it will be more improved than it were before. They can keep attacking us, only to create better infrastructure. This is their choice. Even in places like North Korea, or other censored places like Cuba, there are still people who are fighting for freedom and they have found ways to have internet access, provide information, and still fight for what they think is right.

We have people from all over the world, and it would be great if we did the same, as freedom is under threat. Raising webpages, storing files, and creating mirrors just in case, is something everyone could be doing. Plant the information wherever you can online, safely and anonymously.

However, to make this accessible faster than this in quick fashion, I have done the following which may or may not last, but the point being is, we are gonna prepare a new library all together that will be permanent. We will shortly link these on the JoS Main webpage:
