

How The Enemy is Binding Gentiles with their Letters

With the final RTR, one can note in the letters the bindings with which the Jewish enemy has been cursing Gentiles.

The ancient Hebrew script shows that the Jews took the letters from the ancient Gentiles and literally reversed them. They even turned the letters around backwards in the Jewish corruption of them in their ancient alphabet, which is about reversal. They even changed the direction of reading them.

In Kabbalah, the Hebrew alphabet is shown as the 22 pathways on their tree, which relates to the 33 pathways of the soul. This means the major nadis in the spine and how they connect into the chakras. It's all about binding the entire Gentile soul with their Alphabet.

The ninth letter, when reversed in the RTR, has Set within this. Set in Ancient Egyptian tradition is the God that purifies and opens the soul to the breath of life, which is the flow of the prana. In Hinduism, the word "nadi" is Nad, which means flow, and the I represents Shakti, or energy. Therefore nadi is the flow of pranic or spiritual energy throughout the body, and it also relates to sound because energy is vibration. Prana is likened to breath. The breath of life in Hinduism, the Na. relates to the element of air in Sanskrit.

In the original teachings, Set baptizes Osiris in the Nile river. In the Vedic world, this is the symbol of the seven rivers opening up to the cosmic ocean. The rising of the serpent that opens all the chakras and brings about the reborn state of the Light Body. Set destroys the symbol of the body in the dormant spiritual state which is the demiurge state, and brings about enlightenment and immortality as a result. A lot of nonsense has been written by Christians about Set as they seek to impose their Jewish lie of Christianity onto another culture. Set was openly worshiped as a good and important God all the way into the Roman Empire until Christianity destroyed everything. Set was also shown in symbols that relate to the kundalini energy purifying the individual being to transform them into the Light Body and super-consciousness state. The symbol for this state occurring in Vedic cosmology is the lightning bolt of Indra. This is Set's power as well. It is the energy that connects the root chakra to the crown which is the rising of the serpent power and transmutation of the elements of the soul.

This ninth letter of the Jewish enemy is about binding the Gentile soul at the root chakra and keeping Gentiles from being able to ascend the serpent and become spiritually reborn into the Light Body.

The reversal of the A letter which is called the Aleph, is Phala. This is another spelling of Phallos as well in the ancient Gentile language which relates to the breath of life in the form of the Solar Chakra. The Phallos, or OM Phallos, is a symbol of Dionysus, and it is the symbol of the solar chakra. This is the breath of life in the sense that this chakra rules transforming prana into vital life energy and sending it to the chakras. The naval chakra is the King of the Gods as it rules the other Gods or chakras because they all connect to this point. This is the 666 and the ancient capstone.

This reversed letter Aleph is designed to curse and bind the solar chakra of Gentiles because it is the major chakra that is responsible for transforming the soul through the Magnum Opus into the immortal state of the Light Body. This reversal is meant to cut the person off from the flow of life force in general which leaves them in a weakened state. This chakra also connects to its pair which is the Moon chakra that has to do with higher consciousness centers. To empower the sun is to activate this point as well. So it's also about binding the third eye indirectly. By binding this chakra they also deprive all of the other chakras of energy. The Aleph letter in Kabbalah is shown to be related to the solar chakra for this reason. The symbol of this is the binding of the eight-spoked wheel in Kabbalah for reasons stated. The eight-spoked wheel is the ancient symbol of all the chakras connecting at the solar chakra.

These are just two examples out of all of the Jewish letters, and note how serious this is even with only these two that I mentioned. What do you think all of them combined are doing? They are working to curse and destroy the Gentiles at the soul level.

Doing the Final RTR is opening the pathway for you to be able to ascend the serpent and work towards the Magnum Opus. This Final RTR needs to be done daily as it's also a form of power meditation as well.

The more you do the Final RTR, the easier it gets to pronounce.
