

Article 13 is Dying

Article 13 is running out of speed. The attempts to fast track this law have been shot down, and the way it's going, Article 13 might not last. The protests against it in Europe are huge and passionate. People are fed up and are not taking this crap anymore. This Article is the attempt to censor free speech to protect the criminal class that runs Europe and the world.

This is the reality. The immigration problem is not happening in isolation. It is the result of a larger matrix of energy and years of conditioning via the programs of the enemy.

By removing the enemy's massive matrix of energy right out from under them with the RTRs, this is solving the immigration issue almost overnight looking at how fast this has happened. The immigration issue can only be solved by what is happening: The collapse of the EU.

This is due to our RTRs. Keep up with the RTRs! We are winning!
