

Nietzsche And Satanism

This is an answer I gave on the subject of Nietzsche.

Nietzsche's big work was moving German philosophy away from Christian thinking and influence, and creating a new path away from it. Nietzsche lost his career for his work, "Thus Spake Zarathustra" because of its attacks on Christian ideology. He couldn't get hired in any university in Germany after that, and they openly told him it was for that reason. I suspect more than one German philosopher hated Christianity and somewhat worked outside of it, but didn't come against it because they didn't want to deal with the blowback.

Nietzsche's "ubermensch" is, in all reality, a person free of Christianity who follows their own inner self realization to self development and actualization without any self sabotage; they are free to manifest the life they wish in accordance with their spirit. This allows the person to follow their natural ascending path, which is the normal flow of the will of life in the universe. This is also the obvious reason why we have this normal thing called ambition. It's the desire to evolve within us, and to become something more (as well as whole as a being). This is what Christianity is at war with within the human psyche.

I suspect that Rudolf Steiner might be the origin of the Jewing up of Nietzsche's works. He showed up in the last few years of Nietzsche's life when he was living with and being cared for by his sister because he was no longer able to be present mentally due to his hereditary illness. Steiner just seemed to latch himself onto Nietzsche's train, and he even was hired by Nietzsche's sister after he conned his way into her presence. Steiner's goal was to take over the spiritual/philosophical trend in Germany and push all the actual spiritual knowledge and Paganism out of it, and replace it with a Judeo-Christian narrative and pass this off for "western" tradition. This is why the Thule Society denounced him. Steiner was also actively attempting to organize the Theosophical groups in Germany to oppose National Socialism and the Thule Society. Steiner used psychic warfare against them and initiated a magical war, and he lost. Steiner was known to be an agent of the Jews.

Nietzsche, due to his way of living, spent most of his time in quiet places in solitude, which opens up the mind psychically. He even called his work "meditations." He had some type of discipline even while appearing in a mundane practice. From studying his life, I wonder how much of Nietzsche's work was actually channeled from our Gods without him knowing it. Tesla was the same; he telepathically channeled information from Satan, especially during his vision of the knowledge of AC. Hitler was an open medium who channeled

some of his speeches and works as well from Satan and our Gods, but he did so knowingly as he was a highly ascended being who had a lifetime of spiritual practice dealing with Kundalini energy and development of the mind. This is why the enemy puts so many negative imprints in the mass mind against Satan and our Gods; it creates psychic blocks to being able to contact the Gods or to allow for communication from them on the telepathic level. Nietzsche was free of Christianity, and he was a Pagan by his own statements which creates an unconscious window for telepathic communication with Satan and our Gods. By being a Pagan and rejecting Christianity, that made Nietzsche a Satanist. The enemy also makes that clear in their own Bible.

Nietzsche's sister whom he was close with all his life organized his works and created an institution around them for him. She was an open supporter of the National Socialist Party in Germany. After she passed away in 1935, Hitler as the leader of the German nation openly came to her funeral to pay his respects to her and her work for the Party, as well as her work to destroy Christianity by her efforts to promote her brother's philosophy. Without her it would have been lost to time and forgotten which is what the enemy wanted. She was also a well-known anti-Semite. Hitler quoted Nietzsche many times in personal conversation including when Hitler stated: "I am a Hellene!" which was the term for Pagan.
