

## On Varvara and the Soul

Varvara Ivanova was a Russian parapsychologist who was deemed the top of her field in her time in Russia. She was documented and well-known by her peers in the scientific establishment and the world in general, in which she taught how to be skilled in telepathy, a powerful clairvoyant, psychic healer, hypnotherapist and well versed in reincarnation realities.

In a rare interview with her by American parapsychology researchers she spoke on many important things. Note that she was persecuted by the Soviet regime and they came down on her hard when she attempted to teach a school of how to open the clairvoyant abilities. They banned this school for this reason. She was made homeless and stayed one step ahead of the (((KGB))) that were trying to follow her everywhere.

In the interview she mentioned some important things. This is also commented on in the Hindu texts as well. The fact is past life karma effects people in the present life. She mentioned a case of a Russian woman in the country, who she healed. This woman was simply cold all the time and in pain and she was suffering all the time from ailments that caused this. Varvara stated she saw into this woman's past life, she was chained to a wall in a prison that was cold and she was forced onto a bench where she was tortured by the Church. This was the cause of the current ailment. She also mentioned how emotions and behaviors, impressions from past lives play into this life in general. Such as a man who his whole life was anxiety ridden over people walking behind him. He turns out he was murdered in a past life from being shot in the back. All such cases relate to one thing. Impressions on the soul are karma that follow one into the next lives. These, as in the case of the sick woman, when certain planet transits occur can manifest as illness or other ways that can ruin one's life. She also mentioned a case of a woman who had committed suicide in a past life and how the psychological behavior pattern that caused this was still haunting her current life. She stated that patterns, if not broken and confronted, will just keep going on and on in life after life causing the same problems.

It was also mentioned that negative thinking about such abilities gets in the way of manifesting abilities. Note that the Jews create and run the neo-atheism movement, which promotes Marxism. Hitchens the Jew was an open Trotskyite (one who believes in a Global Communist State) and promoted Marxism his whole career. The message they always promote is that spiritual abilities don't exist Goyim. These negative attitudes are designed to create an impression in the soul to close this off. The Jews also do this with their program of Christianity,

saying that such abilities are scary and evil so they create negative impressions in the soul to attempt to shut the door to such developing.

Something important Varvara mentioned was that she had been burned at the stake in two previous lives for her psychic abilities by the Church. This shows that spiritual abilities that are developed are carried on through different lives as well. The Jewish program of Christianity and their Church is a weapon to remove spiritual knowledge and destroy spirituality advanced Gentiles, as they are the danger to their agenda.

Varvara also stated her ability to learn eight languages in many cases was from past lives of having spoke several of them. And that knowledge that is learned in past lives stays with one in the unconscious mind. And can be accessed again. Many people go towards things in life that reflect this. This is important in understanding why the enemy removes spiritual knowledge so one is also removed from any knowledge in future lives that the enemy wants gone. There are spiritual techniques still used in Hinduism that allows for people to bypass the loss of memory and reincarnate with their personality and full memories intact. There are documented cases of this happening in India to this day. Note that Krishna tells Arjuna something interesting as well. He has all his past life memories fully known to himself by virtue of his level of spiritual development. This is a Siddhi power in Yoga.

This was revealing as well. One man, when regressed into his past lives, it turned out that his speech problems of stuttering was due to guilt he felt over something he committed in that life. He betrayed a loyal friend. The guilt for this manifested as the stutter, perhaps because he spoke false words. He felt he needed to SUFFER and be PUNISHED for this, so that is how this manifested.

Think about that if you inflict a guilt complex on a person's soul and tell them they need to suffer and fill them with negativity..... It will manifest in all sorts of ways in a person's life and next lives that cause them suffering and destroy them. That is the core message of Christianity that one has to suffer for being born a "sinner" and one has to feel guilt and self hate over this. Why do you think there are some many problems in society.....

The important fact to learn from this is that you should also be doing workings to clean your soul. It could save your life on so many levels.

### **Reply from High Priest Hooded Cobra 666:**

In the case of astrology this is also fairly evident in regards to many people.

Many people are born with charts and tendencies that simply do not apply to someone simply born yesterday. The idea of a non linear life where one does simply YOLO does not explain why some people are extremely knowledgeable out of nowhere while others are 65 years old with a brain of a 5 year old.

*Sero wrote:*

*So say if someone is depressed in this lifetime and they battle their thoughts to the end - they could be born with no depression in their next life? Same with all diseases as well, right?*

*If someone is born with a heart disease for example, or manages to develop one eventually, if they kill them selves they'll be rebirthed in a worse condition and if they live through it, they'll be healthy in their next lives?*

Depression is a cause of many psychosomatic and thought patterns (or events) that are imprinted on the individuals.

### **Reply from High Priestess Maxine Dietrich:**

Varvara Ivanova was homeless, lived on the street and with others who would take her in and was incessantly dogged by the KGB.

I noted the reason for this is from her past lives and present one. She is and always has been too tolerant of the enemy. This is why she experiences such injustice.

She has never applied her gifts for helping herself or for fighting the enemy.

The book is a most excellent read and very revealing.
