Greetings to all our Satanic Family and People.

We have been working overtime to get all the websites that were shot down by the enemy. The enemy just simply wants to damage all of you by taking away these websites, the people that know of spiritual knowledge are threatening to their agenda. No need to worry about anything, merely, make sure to keep the appropriate backups of the pages you need and of the information. With that being stated, we keep growing. Those of us who are responsible of the websites are going to do everything we can (and more...) to provide you with everything and keep going constantly.

All the attacks of the internet happened during the Jewish Holiday of Hanukkah. The enemy simply just has this whole deal about attacking on their holidays, because this is in the bible. In particular this deals with their 'established world' and taking revenge on the Goyim for destroying their so called "Second Temple" in Israel. The Hanukkah is the 'dedication' to this cause. The 'messianic government' of the jews cannot happen in a world with free flow of information, so they try to destroy the internet. They try to synchronize the pseudo-history with the real world. Thanks to the idiots who believe in christianity, this can gain power for their attacks. Hanukkah lasted from 12 to 20 December this year, on the 6th day from the end (14th) they launched their attack. The jewish calendar goes backwards in that way. They also pulled other attacks on the JoS at this date, same as many of their other enemies. Obviously these were only lesser effective. But that's it for now.

There is a chance we will be posting something SPECIAL around the 23rd. If not, we follow this schedule regardless.

The whole issue with the internet is still open. We will let a day for the energies to rest on the 23rd of December (The retrograde ends at this date) and start anew after the retrograde with the Communications RTR. Everything else will be going as usual, and we will insist on fighting. The enemy has been feeling the pressure, or they wouldn't be going crazy like they do now. Even the 'internet archive' which is supposed to keep a history of the internet, they decided to take some of our websites down.

Now imagine, this is the same thing as deleting history and deleting that someone ever existed - a communist practice of the enemy which happens all the time. The Old Gods, since the enemy has hidden proof, they have convinced the unknowing populace that somehow, their own 'beliefs' are the 'real' ones. Deleting history is a well known jewish practice. The history of White people has been perverted and fragmented, with percents up to 95% of writings to have been burned.

One example is the ancient Greek history which so many people 'cite' ad nauseum.

It's well known what we have today is only the few remains. For many centuries in the middle ages, all these texts were altered by the church to make it look as if "Christianity" is some sort of natural thing and some continuity of history. The majority of ancient authors have had all their writings to disappear, extremely important info that could evolve us who knows how much right now. In other cases such as the Black people, the jew has deleted even more evidence, causing all the more confusion to black people and blaming whites for it. Why am I saying all this?

To show you the importance of the knowledge you have today in such availability. People would sacrifice themselves and not even kings and queens had the knowledge which many of you possess today. Make use of it. You have very important things in your hands and they must not go to waste and/or be allowed to disappear. There are ways you can save this information safely for yourself, beyond the reach of other people if needed.

In regards to the holidays, these belong to us. Instead, people will be celebrating in the jewtrix about the birth of a fictitious, imposter enemy jew, and even feed it energy so they can further their own destruction next year. Nonsense. In other words, we will ruin their little holiday this year because this whole meme empowers the enemy for the coming year. The enemy then takes this energy raised, and coupled with nefarious rituals, they try to form the plan for their next year of action.
