

SATANAMA, Not YHVH, is The Name

In Kabbalah, the YHVH, "The Name", is given the code of male, female, male, female. This is for the 12 signs of the Zodiac, which are grouped similarly. Air and fire are male and earth and water are female. The YHVH in the Tarot is placed on the cardinal points to show this as well. This expands out to the 72 names, which relate to the energies of the decans along the Zodiac.

However the proper name for the four corners is not YHVH. It is SA TA NA MA in Sanskrit, the original language, which has the energy of the elements that rule all existence. This includes the Zodiac houses and planets associated with them, all of which are governed by the five elements. SA TA NA MA is the formula that governs everything. This includes the entire Sanskrit alphabet as well, which is the sound-form of the Gentile soul. SA TA NA MA is also the name of the serpent deity, which symbolizes the heavens and the wheel of the Zodiac. The mantra of SA TA NA MA is dangerous and destructive to the Jewish enemy and their strange alien soul, so they had to corrupt it for themselves, changing it to something strange that suits their own alien soul.

In the ancient world, the name of the five elements is "The Name of God", which is SATANAMA.

It just is. The Jews have an alien soul designed to destroy the Gentiles. That is why Jewish soul consciousness expresses this one desire and behavior. Even the Jewish alphabet was created by stealing from Greek, Egyptian, Babylonian, Sanskrit, and then literally reversing it, even the letters and direction of reading from the original. It is a method of black magic against Gentiles. Just to speak Hebrew is a form of evil magic against Gentiles. SATANAMA expresses the vibrational structure of Sanskrit, which is based on the perfect harmonic of the Gentile soul, which comes from Satan. The very name Satanama carries Satan's energy, which is why Satan is called Satanama. Names express spiritual powers.

It has been corrupted into a proto-Christianity. The article I did on the corruptions in Hinduism shows this. The Jews have ruined it over a thousand years.

Isra has something to do with Muhammad's 'ascension to heaven' right? How are you interpreting this?

Is-Ra-El simply is three stolen things that indicates three things. IS, from ISIS, the female part of the soul. RA which is stolen from the God Ra (related to Goddess Isis) and signifies the male part of the soul. EL which is a generic stolen term from light from the Egyptian, Babylonian, and Sumerian IL or ILU. The jews stole these and started calling themselves like that in hebrew to bring this about, while ironically, blasphemed and attacked the original representations of the deities to no end.
