

The Importance of the Name Satan and Saving the Soul

There are five bodies in the ancient spiritual teachings from the East:

Anna maya kosha: the physical body.

Prana maya kosha: the pranic body.

Mano maya kosha: the body of mental energy.

Vijanaa maya kosha: the body of higher intelligence, Buddhi.

Ananada maya kosha: The bliss body.

These five are part of the three worlds that form the entire being.

Shula Sharira: the physical body

Sukshma sharira: the astral body

Karana sharira: the causal body [the Ba to the Egyptians]

I wrote before on how the emphasis on the crown chakra has been removed by the enemy in the corruptions of Kundalini Yoga teachings in Hinduism. The crown chakra is connected to the Ananada maya kosha, which is the causal body, the soul. If this aspect of the being is not empowered, the texts mention the soul stagnates and atrophies. This chakra connects the shaft of light down the spine to the root activating the serpent as well. It rules the whole soul and connects to the universal consciousness field (Nirvana in the Egyptian and Hindu texts). The other reason the enemy has corrupted the knowledge on the crown charka is because this allows one to remember their past lives and maintain their previous personality upon rebirth into a new body, which is linked to the causal body. When the Jews state their curses on this chakra, for the Goyim it means "cut off". It's related to cutting them off from their past lives and personality, thus making them easier victims in each life, and keeping them from developing the soul and raising the serpent. None of the Jewish criminal programs would be successful without these curses. The Reverse Torah Rituals undo this.

SAT is the name of the soul in Sanskrit and the crown chakra is called Sat-ya. The mantra for this is Satanama in Kundalini yoga. This is due to the fact that the causal body, or body of bliss, the eternal aspect of the soul is ruled by this mantra and the vibrational concept it generates. Sanskrit is the language that means "perfection". The words within it are based on the exact vibrational templates that form the universe. SATANAMA expresses this power, which is why the Jews hate this name so much and seek to bind it. SAT is the Shakti energy of Shiva who is the serpent power. SATANAMA is the mantra of SAT. Shiva rules the crown chakra. SAT is also Satan in Sanskrit when fully spelled out. The people who have a problem with this name are fooling themselves if they think they are getting anywhere spiritually. Note that Christians are materialists and care nothing about the actual soul and how to empower it. The Christian path is spiritual death and nothing else. The ancients warned that if the soul is not empowered it will get to a point where it will be able to not reincarnate and it will cease to exist. It will dissipate the same way the physical body does after death. Christianity is a death cult made by Jews to destroy the Goyim spirituality as well as physically. The Jews created Christianity to cut the Gentiles off from spirituality and our Gods and plug the Goyim into a Jewish thoughtform to drain them of their lives to build the Jewish Global Government in which the Goyim will be exterminated totally once up and running.
