

# The Jews are Crashing the World Markets

If you pay attention between the lines, you'll see the Jews bringing a world economic collapse. The market is crashing daily around the world, we saw major market crashes over the summer and it keeps on rolling. As I mentioned last year - this was coming and it's already here. The Jews are planning to take down the global economy and force everyone to accept one world currency controlled by the Rothschild kike IMF - The Jewish World Bank.

"The establishment of a central bank is 90% of communizing a nation." - Jew Lenin

The establishment of the World Central Bank is 90% of communizing the planet into Judaism.

This is also why the Jews are trying to begin WW3 from the situation in Syria. This controlled chaos of global takeover is where the Jewish heel wants to come down - with the dissolution of governments, nations, races, religions, and lives of billions of humans. Jews state these things will occur in their own holy texts. Over 220 million lost lives in the last century... The Jews will try to microchip the remaining humans and will try to create a comjewist slave planet that is overseen by a technological grid of control from the top down.

Never forget - communism is only the adaptation of Judaism to the modern world. Communism is just another name for "modern" Judaism.

Jewish plans are happening fast and if you don't want your families or yourself to be enslaved and killed by the Jews - you better be doing those Reverse Torah Rituals and start working to get the message out.
