

The Mask is Dropping

Since the Final RTR, the Catholic Church is in what has been called total collapse. The mask on the Jewish game is dropping. The numerous Jewish media outlets that pretend to promote secular values are doing everything they can to defend the Pope and prop this criminal institution up to the public. They are going all out in a panic. Because the Tribe runs all this at the top.

The Jews promote and protect Christianity in everything they do. The Jew Stalin, who was taking orders from the Elders of Zion, reopened the Orthodox Church once they had purged all non-Communist elements from it. They even have icons of Saint Stalin in this Church. Even the Jew Trotsky was shown in Christian imagery. The Soviet Union ran its State Christian Church. Today in Communist China and North Korea, the Catholic Church is there and in power. The Jew Dugin has stated that the Christian Church is the axis of control they want to use as the platform for their Neo-Soviet global empire. The Jews even try and make it taboo to criticize Christianity in the White Nationalist movement which is openly against the Jews for being the engine of White Genocide. Even in anti-Jewish movements, the Jews work to promote Christianity. The Jewish Elders of Zion are trying to create a global Christian Church at their Bilderburger meetings. The entire Bible was originally written in Hebrew because it is their program to materialize the Jewish World Government. Without Christianity, the Jews have nothing.

This is why I keep doing the Final RTR as much as I can these days.

No matter if I am feeling down on some days, and do not feel like doing anything, I keep up the RTR, no matter what.

They are falling down. It is obvious.

Hail Satan! Forever!

Almost from the start of the Final RTR the Catholic Church started to collapse at a rapid pace. Now the scandals from the Americas to Europe are weighing down on them totally. It's out in the open that they're criminal. The enemy is having a major problem with their Communism as well. Trump has openly spoken out against what is happening in South Africa, which is new turn for sure. That sets a precedent and exposes the enemy. The American government is now talking about dealing with the anti-Right censorship by the jew-owned tech companies.

These companies are not so private, as they were built with taxpayer money and government aid. Obviously one level is to act as spy agencies for the deep state. But still, the claim of private this and that does not apply here.

And yet you have idiots in the media saying that Trump is being "divisive" and that it is a "fear mongering myth" that genocide is happening based on race in South Africa. More Bullshit mainstream news to sway the masses.

Last time this happened they were practically begging the white farmers to come back and farm the land again when people were starving. I believe this was in Zimbabwe. We'll see how this turns out...

The Jews don't want Whites paying attention to South Africa because it's the blueprint for all White Nations. S.A is a bunch of clueless Blacks brainwashed on anti-Human, communist ideology being used as a weapon to simply steal the remaining private wealth of South African citizens for the Jews who run the show over there. The Blacks are just going to get to enjoy massive poverty and no rights in the Jewish dictatorship.

Rhodesia is the same thing. The communist puppet of the Jews stole all the wealth from the White farmers and business class, which is communism, and then transferred it to stupid criminals who can't farm. Now the economy is that of a typical communist nation: nothing. Then the Blacks got to enjoy living in a despotic dictatorship that has mass murdered seventy thousand of them as well as thousands of Whites. All the while their dictator is taking orders from the Jewish global elites.

The problem is that smart people don't want to live like this, regardless of race.
