

The Sinking of the Titanic

Just as 911 was pulled off for several reasons, one of them being insurance fraud as the cost of taking the towers down as they were ready to be condemned and falling apart (so the Jews benefited on that level as well). As for the other agenda the Jewish power system had in mind, such as war against the enemies of the Jew World Order in the Middle East: <https://www.911missinglinks.com/>

We also understand the evidence reveals that subliminal messages were used to assist this by using the power of the mass mind, such as with the 20 dollar bill which was circulated for decades before the attack:

We can see the same with the Aurora and Sandy Hook situation.

The Titanic ship was sunk on an occult date: 15 April, 1912 (Good Friday, April 14th was the day the Jewish Rothschilds had President Lincoln killed.) About 14 years before, a novel was put out by Morgan Robertson called "The Wreck of the Titan," in which the largest ocean liner in the world, the "Titan," is sunk in the North Atlantic by hitting an iceberg. The author of this book died of poisoning. Even the specs on the ship in Morgan's book are identical to the Titanic, and even being a British ship designed to carry elite people back and forth. The shipwreck happened around the exact same date as in the book while doing the same amount of knots. And a little known fact is Capt. Smith was in an area of a major iceberg of about 70 miles, and the ship was warned about it by several other ships. The overall story of Morgan's book is identical to the sinking of the Titanic down to the smallest details.

The White Star Line was owned by the Jewish Banker J.P. Morgan, and the ship "Olympic" was decided to be scuttled on purpose under the false name of its sister ship "Titanic." Many of the crew jumped ship on the first port of call during the doomed voyage of the "Titanic," and by their own testimony they knew they were on the Olympic as they had served on the ship. They knew something was

up given the purposeful stoking of a fire in a coal chamber on the ship (which if cold water hit it, it would blow). Ballard found a large hole blown out in the side of the wreck when he found it, and it was right where the stoked fire was being kept. Surviving witnesses stated this area had exploded which helped to sink the ship.

The J.P. Morgan owned ship "California" was mentioned in the documentary film, and by witness accounts it was barely 19 miles off. They could see the bow and stern lights of the ship, and could hear when the screaming stopped. They could hear the steam boilers turning on in the California. The California then left, and only returned in the morning. Capt. Lord purposely held back and refused to allow any help from his ship. Capt. Smith probably realized too late that he had been double-crossed.

This gets into the second reason. J.P. Morgan and his close associates all canceled their passage of the HMS Titanic at the last moment. J.P. Morgan was found to be lying by an American reporter about his reasons for this. Many of the people taking passage on the ship were political and economic elites who, one way or another, were opposed to the Jewish Bankers trying to pass the Federal Reserve Act as well as their attempt to create fossil fuel corporations. Some of them such as Astor were backing Nikola Tesla and his work, which Morgan had worked to shut down as it was opening up a rival source of energy free of cost. Tesla also invented a turbine system that could run off of any type of fuel; not just fossil fuel.

After this ship sunk, killing many of the elites aboard [the Jews cut a few of their own loose for whatever reason], the Jews were able to pass the Federal Reserve Act, and created a fossil fuel dependence monopoly. They got America into the First World War which enslaved America to the Federal Reserve Bank more quickly, and allowed for the creation of the Great Depression that wiped out all Gentile businesses and media classes in America. This centralized all power under the Jews, and allowed for the facilitation of the rise of global Jewish Communism and the pushing of America into World War II.

Note all the safes brought up from the wreck of the HMS "Titanic" were found to be empty of all gold and silver which such a ship would normally be carrying large amounts of. Just as the 911 vaults were emptied before the attacks. There was no explanation for this other than that it was an inside job.
